REPORT

TO

HIS EXCELLENCY WILLIAM HUMBLE, EARL OF DUDLEY,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit, for your Excellency's consideration, the Thirty-ninth Annual Report on Marriages, Births, and Deaths in Ireland.

GENERAL SUMMARY.

The Marriages registered in Ireland during the year 1902 number 22,949 ; the Births, 101,863 ; and the Deaths, 77,676. The marriage-rate (5·18 per 1,000 of the estimated population) shows an increase of 0·10 as compared with that for the preceding year, and is 0·27 above the average rate for the ten years 1892-1901, and higher than the rate for any of these years ; the birth-rate (23·0 per 1,000) is 0·3 above the rate for the preceding year, but 0·1 under the average rate for the ten years 1892-1901 ; and the death rate (17·5 per 1,000) is 0·3 below the rate for the preceding year, and 0·8 below the average rate for the ten years 1892-1901.

The recorded natural increase of population, or excess of births over deaths, was 24,187 ; the loss by emigration amounted to 40,190 ; there would thus appear to have been a decrease of 16,003 in the population during the year, but against this decrease there is a set-off in immigration, of which no official record has been obtained. The estimated population in the middle of the year was 4,432,274.

TABLE I.—Showing for each of the years 1892-1902 the estimated **Population**; the number of **Marriages**, **Births**, and **Deaths** registered, and the number of **Emigrants** enumerated, with the rates per 1,000 of the estimated Population represented thereby ; and the averages for the ten years 1892-1901.

YEARS	*Estimated* Population in the middle of each year	Numbers *Registered*			Number of Emigrants as returned by the Enumerators	Rate per 1,000 of Estimated Population

I have constructed the Diagram opposite (No. 1), which shows the respective rates per 1,000 of the population represented by the Marriages, Births, and Deaths registered in Ireland in each of the twenty years 1883-1902, and by the number of Emigrants enumerated in the same years.

* See page 170.

There are 2,683 Local Registration Officers holding office directly under the Department, or who have entered into bonds with the Registrar-General for the due discharge of their duties. During the year 1902, 578 cases of vacancies or appointments were dealt with.

I append a table showing the number of Searches made and Certificates issued at the General Register Office (exclusive of Searches made and Certificates issued for official purposes, which, in 1902, numbered 259 of the former and 215 of the latter); also the amount received as fees for same, in each year, since the commencement of the Acts for the Registration of Births and Deaths and of Roman Catholic Marriages in 1864.

TABLE II.—NUMBER OF SEARCHES made; number of CERTIFICATES issued, and Amount received as FEES for SEARCHES, &c., at the GENERAL REGISTER OFFICE, DUBLIN, during the 39 years 1864-1902.

1883, . .	1,036	773	149 1 6				

During the financial year ended 31st March last, 535 cases were reported of offences against the Acts administered by this Department. On careful inquiry into the circumstances, prosecutions were ordered to be instituted in 55 cases. In 39 of these the parties were convicted and punished; in 15 the proceedings were abandoned, the parties (in most instances) paying the costs of court and complying with the law; and in 1 case the summons was dismissed.

The cases dealt with included the following offences:—Neglect to Register Births; neglect to Register Deaths; neglect to furnish Certificate of Marriage; failure of Coroner to furnish Certificate of Inquest; giving false information when registering births; giving false information as to age at death.

A sum of £130 was provided in the estimate to meet legal charges. The total cost of the legal service of the Department during the year was £65 19s. 0d., of which sum £52 10s. 6d. was paid for local professional assistance, and £7 2s. 6d. for mileage to the Registrars.

MARRIAGES.

The number of Marriages registered during the year is 22,949, being equal to 5·18 per 1,000 of the estimated population,* a rate which is 0·10 above that for the previous year, 0·27 above the average for the ten years 1892-1901, and higher than the rate for any of these years.

Of the 22,949 Marriages registered during last year, 15,916 were between Roman Catholics; 3,633 were celebrated according to the rites and ceremonies of the Church of Ireland; 2,441 were in Presbyterian Meeting-houses; 565 in "Registered Buildings" belonging to various religious denominations; only 382 by civil contract in the Registrars' offices; 5 were according to the usages of the Society of Friends; and 7 according to the Jewish rites.

The Roman Catholic Marriages are equal to a rate of 4·84 per 1,000 of the estimated number of Roman Catholics, being 0·34 over the corresponding average rate for the preceding ten years, and higher than the Roman Catholic Marriage rate for any of these years; and the other Marriages represent a rate of 6·15 per 1,000 of all persons other than Roman Catholics in the population, this rate being 0·10 over the corresponding average rate.

Of the 3,633 Marriages according to the rites of the Church of Ireland, 37 were by special licence, 3,166 by licence, 401 after the publication of banns, 17 on Registrar's certificate, and in 12 instances there was no information afforded as to which of these methods was adopted.

* The rates for the total of Ireland and for the County Bboroughs of Dublin and Belfast are based on the estimated population in the middle of the respective years, those for Provinces for the years 1900-1902, and for Counties for the year 1902 on the population according to the Census of 1901, and those for the Provinces for the years 1893-1899 on the population according to the Census of 1891. The Provinces and Counties adopted for 1899-1902 are the areas as constituted after alterations made under the Local Government (Ireland) Act, 1898.

TABLE IV.—**Marriages** registered in Ireland in 1902, and in each of the previous ten years, according to the **modes of celebration**; with the rate per 1,000 of the population represented:—

During the year 1902 there were issued by the Registrars 806 Licences for Marriages in Registered Buildings and in the Registrars' Offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod	Number of Licensing Ministers on 31st December, 1902.	Number of Registered Meeting-houses on 31st December, 1902.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland	157	591	2,295
2. Remonstrant Synod of Ulster	9	19	23
3. Presbytery of Antrim	6	10	24
4. United Presbytery or Synod of Munster	2	2	0
Total	174	622	2,342

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1902, there were 1,488 churches and chapels of the Church of Ireland, 622 registered Presbyterian Meeting-houses, and 402 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show an increase of 5 as regards the Church of Ireland, an increase of 2 in the number of Presbyterian Meeting-houses, and an increase of 1 in the total number of "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1902:—

Denominations.	No of Places of Worship.
Methodists,	244
Reformed Presbyterians,	38
Independents,	25
Baptists,	25
Christian Brethren,	15
Moravians, or United Brethren,	9
United Free Church of Scotland,	8
Seceders,	8

Denominations.	No. of Places of Worship.
Salvation Army,	9
Methodists, New Connexion,	7
Jews,	2
"The Catholic Apostolic Church,"	2
Non-Subscribing Unitarians,	2
Unitarians,	1
Covenanters,	1
Welsh Presbyterians,	1

Denominations.	No. of Places of Worship.
United Original Seceders,	1
"Protestant Dissenters,"	1
Non-Subscribing Christians,	1
Congregational Union of Scotland,	1
"Undenominational,"	1
Total,	402

Of the 22,949 marriages registered during the year 1902, there were recorded—in the first quarter, 6,793; in the second, 5,377; in the third, 5,426; and in the last, 5,353.

The marriages of bachelors and spinsters constitute 88·3 per cent. of the total; those of widowers and spinsters, 7·3 per cent.; of bachelors and widows, 2·6 per cent.; and of widowers and widows, 1·8 per cent. Thus 9·1 per cent. of the men married were widowers, and 4·4 per cent. of the women were widows; and in 12 instances, in every 100 marriages, one or both of the contracting parties had been in the married state before.

TABLE V.—Showing, by QUARTERLY PERIODS, the number of MARRIAGES registered in Ireland in each of the eleven years 1892-1902, and the average number for the ten years 1892-1901, distinguishing the number of Roman Catholic Marriages registered under the 26 & 27 Vic., cap. 90, and of Protestant and other marriages under the 7 & 8 Vic., cap. 81.

A complete registry of the exact ages of the persons married would be valuable from many points of view : hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or of "full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1902 the ages of both parties were specified in 3,459 cases only, being less than one-sixth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 22,949 men married during the year, 338, or 1·47 per cent., were minors; and of the women married 1,409, or 6·14 per cent., were under age.

The highest proportion married under age in 1902 of husbands (1·91 per cent.) and of wives (7·32 per cent.) was in the province of Ulster.

It may be added that the per-centage of persons married in Ireland, who were under age, is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1902, 20,301, or 88·5 per cent., of the husbands, and 20,796, or 90·6 per cent., of the wives, wrote their names, and the remainder signed by marks.

These figures show a considerable improvement as compared with the corresponding results in the first of the preceding ten years, the per-centage of persons married in 1892 who wrote their names, being—men 81·4, and women 81·8; and they exhibit a great advance when compared with the per-centage for the year 1864, when the general registration of marriages in Ireland was established, in which year but 61 in every 100 men, and 50 in every 100 women married, wrote their names.

The per-centages for the several provinces last year range, for men, from 82 in Connaught, to 91 in Munster and Leinster; and, for women, from 88 in Connaught to 92 in Munster and Leinster.

In 935 cases both of the parties married signed the register by "mark," and in 2,931 the register was thus signed by either the husband or the wife, so that in 3,866 cases, or 16·8 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 19,083 or 83·2 per cent., *both* parties wrote their names.

The proportion per cent. of persons married in each of the eleven years 1892-1902, who wrote their names in the registers or certificates; of minors; of widowers; and of widows; is given in the following Table for Ireland, and for each of the four provinces.

TABLE VI.—Showing, as regards the **Marriages** in Ireland, and in each of the Four Provinces, during the years 1892—1902, the proportion per cent. of Persons who **signed their names,** of Persons **not of Full Age,** and of **Re-marriages.**

	1902,	82.4	88.3	0.65	4.12	7.24	3.04

In proportion to population at all ages, the registered marriages were most numerous in the province of Ulster, in which, however, the rate was only 5·8 per 1,000 of the population, according to the Census of 1901; Leinster comes next with 5·5 per 1,000; Munster third, with 4·5 per 1,000; and Connaught last, the rate being 4·0 per 1,000.

The highest County, or County Borough, marriage rate (8·0 per 1,000 of the population) was in the County Borough of Dublin; and the lowest 3·6 in Clare County. Between these the most favourable rates were 7·8 for the County Borough of Belfast, and 5·9 for the Counties of Antrim and Armagh, respectively; and the least so 3·7 for the Counties of Roscommon and Galway, 3·8 for Queen's County, 4·0 for Louth County, and 4·1 for Sligo, King's and Kilkenny Counties, respectively.

BIRTHS.

The number of births registered during the year 1902 is 101,863—52,568 boys and 49,295 girls, or 106·6 of the former to every 100 of the latter—the rate afforded in proportion to the estimated population being 1 in 43·5, or 23·0 per thousand, which is 0·1 under the average rate per 1,000 for the ten years, 1892-1901.

Of the 101,863 children whose births were registered in Ireland during the year 1902, 99,176, or 97·4 per cent. were legitimate, and 2,687, or 2·6 per cent., were illegitimate, being equal to the corresponding average per-centages for the preceding 10 years. These results compare favourably with the returns for most other countries.

Of the children born in wedlock during the year, 51,178 were males, and 47,998 females, being 106·6 of the former to every 100 of the latter; and of the illegitimate children 1,390 were males, and 1,297 females, or 107·2 boys to 100 girls.

Comparing the provinces, we find that the per-centage of children born in Ulster who were illegitimate, was 3·4; in Leinster, 2·8; in Munster, 2·4; and in Connaught 0·7.

TABLE VII.—The Per-centage of **Legitimate** and of **Illegitimate** Births registered in Ireland during the years 1898-1902 by Provinces.

Provinces	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1898	1899	1900	1901	1902	1898	1899	1900	1901	1902
IRELAND .	97·3	97·4	97·3	97·4	97·4	2·7	2·6	2·7	2·6	2·6
LEINSTER . .	97·4	97·5	97·5	97·3	97·2	2·6	2·5	2·5	2·7	2·8
MUNSTER . .	97·6	97·7	97·5	97·8	97·6	2·4	2·3	2·5	2·2	2·4
ULSTER . .	96·3	96·6	96·4	96·6	96·6	3·7	3·4	3·6	3·4	3·4
CONNAUGHT .	99·4	99·3	99·5	99·3	99·3	0·6	0·7	0·5	0·7	0·7

The respective total birth-rates for the provinces in 1902 were—Leinster, 23·0 per 1,000 of the population in 1901; Munster, 22·0; Ulster, 23·9; and Connaught, 21·6.

The four highest birth-rates were in Dublin County Borough, 31·3; Belfast County Borough, 30·3; Kerry County, 24·4; and Mayo County, 23·7. The lowest rates were —King's County, 17·4; Cavan County, 18·8; Tipperary N.R., 18·8; and Roscommon, 18·9.

Of the total births, 51·5 per cent. were registered in the first six months of the year (181 days), and 48·5 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 25,838; in the second, 26,604; in the third, 25,173; and in the fourth, 24,248.

DEATHS.

The number of deaths registered during the year is 77,676, being equal to 1 in 57, or 17·5 per 1,000 of the estimated population. The deaths of males number 38,569, and those of females 39,107, the former being equal to 17·6 in every 1,000 males living, and the latter representing 17·5 per 1,000 females.

The death-rate (17·5) is 0·8 under the average rate for the preceding ten years, and 0·3 under the rate for the year 1901.

As usual, very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this Department, and it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts.

With respect to the death-rates for the four provinces, the rate for Connaught is only 13·6; that for Munster is 16·5; for Ulster, 18·1; and for Leinster, 19·5 per 1,000 of the population in 1901.

The five County, or County Borough, areas having the lowest registered mortality are —Mayo County, 12·5; Roscommon, 12·8; Leitrim, 13·6; Kerry, 13·6; and Cavan, 14·4.

Those in which the rate was highest are—Dublin County Borough, 26·9; Belfast County Borough, 21·0; Armagh County, 19·5; Monaghan, 19·2; and Louth, 18·6.

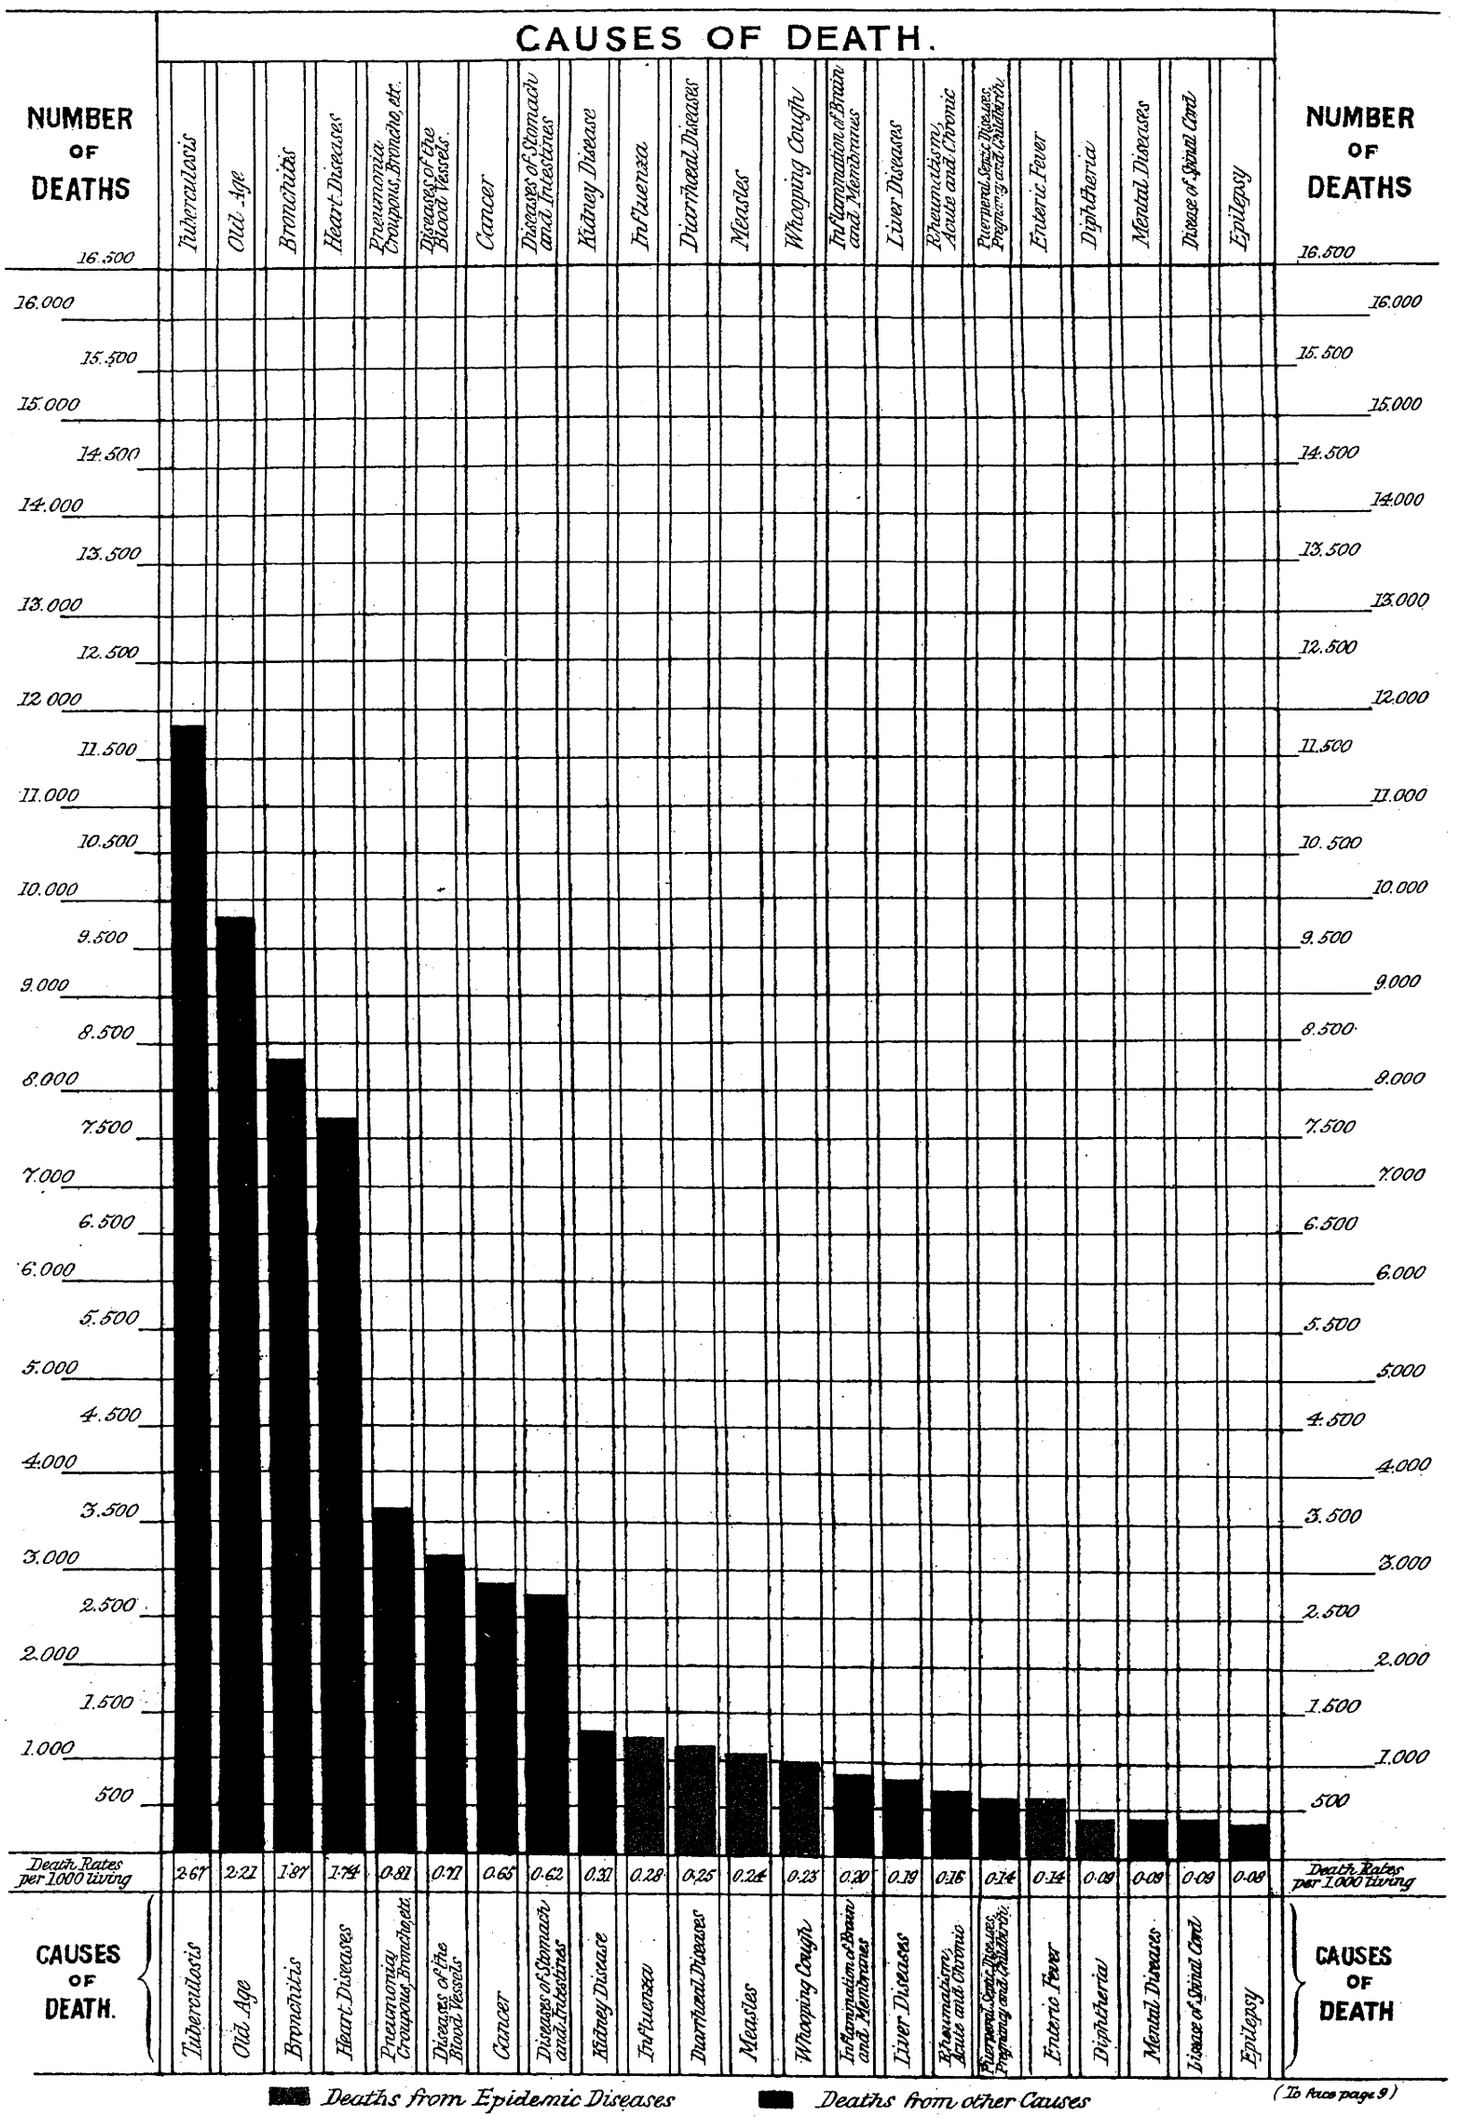
The deaths registered in the first half of the year generally outnumber those in the second. In 1902, 54·2 per cent. of the total deaths were registered in the six months, January to June inclusive; and 45·8 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follow:—First quarter, 19·5 per 1,000 of the population; second, 18·5; third, 14·6; and fourth, 17·5. The rates for the first, second and third quarters are 2·9, 0·4, and 0·4 below, but that for the fourth is 0·8 above, the corresponding average rates for the respective quarters in the ten years 1892-1901.

From the table on pp. 158–167 *it will be seen that of the* 77,676 *deaths registered during the year,* 3,089 *took place in Infirmaries and General and Special Hospitals*; 1,329 *in Public Lunatic Asylums*; 10,080 *in Workhouses and Workhouse Hospitals*; *and* 63,178 *were of persons who died "At their Own Homes, &c." As in former Reports a Table* (*see pages* 168–9) *is given showing like information for those Registrars' Districts in which the principal Urban Districts in Ireland are situated.*

The deaths in "Infirmaries and General and Special Hospitals" constitute 4·0 per cent. of the total number, the per-centages for the four provinces varying from 0·6 in Connaught to 9·4 in Leinster. Thirteen per cent. of the deaths registered occurred in Workhouses or Workhouse Hospitals, the respective per-centages for the provinces being—Leinster, 14·9; Munster, 17·8; Ulster, 9·6; and Connaught, 9·2.

DIAGRAM No. 2.—Mortality from Twenty-two of the Principal Causes of Death, in Ireland, in the Year 1902.



(To face page 9)

TABLE VIII.—Showing, by QUARTERLY PERIODS, the number of BIRTHS and DEATHS registered in Ireland in each of the eleven years, 1892-1902, and the average number for the ten years, 1892-1901.

CAUSES OF DEATH.

The classification of Causes of Death in this Report is that of the Official Nomenclature of Diseases, 1896, with a few modifications, adopted after consultation with the Registrars-General of England and Scotland.

I submit a Diagram (No. 2) showing the comparative mortality from twenty-two of the principal causes of death in Ireland in 1902. The numbers range from 334 deaths from epilepsy to 11,837 from tuberculosis.

GENERAL DISEASES.

Small-pox.—One death from smallpox was registered during the year; the deceased (a female) who was stated to be vaccinated in infancy, had reached the age of 60 years.

Measles.—The deaths recorded from this disease, in number 1076, exceed the total of the previous year by 617, and the average of the ten preceding years by 245, and are equivalent to an annual rate of 0·24 per 1,000 of the population of Ireland estimated to the middle of the year 1902—the average for the previous ten years being 0·18 per 1,000. In Leinster there were 461 deaths from measles, in Munster 136, in Ulster 475 and in Connaught 4; the figures for the provinces represent the following rates per 1,000 of the population:—0·40, 0·13, 0·30 and 0·01, respectively.

From the Tables at pages 168-169 it will be observed that 887, or about 82 per cent., of the total deaths from measles occurred in the Registrars' Districts containing the Urban Districts having a population of 10,000 or upwards, and that only 189, or about 18 per cent., took place in other parts of the country. In the Dublin Registration Area 386 deaths were registered, in Belfast County Borough 355, in Limerick County Borough 64, in Londonderry County Borough 31, in Cork County Borough 19, and in Ballymena Registrar's District 10. Excluding the Unions containing the Urban Districts referred to above there were 10 or more deaths from measles in each of the following Unions, viz.—Armagh 24, Inishowen 17, New Ross 15, and Carlow 11.

As regards the sex of those who died from measles, 538 were males and 538 females. Of the total number of deaths from the disease 963 were of children under 5 years of age, of whom 225 were under 1 year old, 402 were aged 1 but under 2 years, 189 were aged 2 but under 3 years, 91 were aged 3 but under 4 years, and 56 were aged 4 but under 5 years.

The following TABLE (IX.) shows (1) the Number of Deaths from All Causes, and from with the Average Annual Number for the ten years 1892-1901; and (2) the respective

* The rates for the years 1893-9 for the Provinces are based on the Census of 1891, those for the years 1900-1902 on the Census of 1901. See Note (*) on page 3.

Scarlet Fever.—The deaths registered from scarlet fever in 1902 numbered 186—87 males and 99 females—affording a rate of 0·04 per 1,000 of the estimated population ; the total is 19 under the number registered in the preceding year, and 246 under the average number for the 10 years 1892-1901. In the 4 Provinces the number of deaths registered was as follows :—In Leinster 91 ; in Munster 38 ; in Ulster 50 ; and in Connaught 7. In the Registrars' Districts containing the Urban Districts having a population of 10,000 and upwards 101 deaths from scarlet fever occurred—including 71 in the Dublin Registration Area, and 15 in Belfast County Borough—and 85 deaths took place in other parts of the country. Of the total deaths from scarlet fever 99 were of children under 5 years of age, including 11 under one year old, and 50 were of children aged 5 years but under 10.

Typhus Fever.—The deaths from typhus fever, 83 in number, are equal to an annual rate of 0·02 per 1,000 of the population, and are 9 below the number recorded in 1901, and 52 per cent. below the average number in the 10 years 1892-01. Of the 83 deaths, 9 were in Cahersiveen Union, 6 in Clifden Union, 7 in Galway Union, and 4 in each of the Unions of Dublin North, Dublin South, and Millford.

Influenza.—The deaths from influenza during the year numbered 1,258—620 males and 638 females—being 123 under the number recorded in the preceding year, and 872 under the average number for the 10 years 1892-1901. The 1,258 deaths are equivalent to an annual rate of 0·28 per 1,000 of the population—the rates for the Provinces, arranged from the highest to the lowest, being—0·34 per 1,000 for Ulster, 0·30 for Connaught, 0·26 for Leinster, and 0·21 for Munster. In the Counties the highest rates were—0·52 per 1,000 for Tyrone, 0·50 for Donegal, 0·46 for Monaghan, 0·44 for Cavan, and 0·42 for Down ; and the lowest were—0·09 for Belfast County Borough, 0·10 for Clare, 0·11 for Longford, 0·16 for Kildare, and 0·16 for Cork County and County Borough. One or more deaths from influenza occurred in 143 of the 159 Unions or Superintendent Registrars' Districts in Ireland—the 10 highest rates being as follows:—Inishowen 1·45 per 1,000, Dingle 1·15, Cookstown 0·93, Roscommon 0·92, Mohill 0·91, Dungannon 0·89, Shillelagh 0·78, Kilmallock 0·78, Tullamore 0·73, and Downpatrick 0·69. Of the 1,258 persons who died from influenza 136 were aged 45 years and under 55, or 0·33 per 1,000 of the estimated population living at that age period ; 254 were aged 55 and under 65—the rate being 0·73 per 1,000 ; 273 were aged 65 and under 75—the rate being 1·44 per 1,000 ; and 202 were aged 75 years and upwards—affording a rate of 2·17 per 1,000.

Whooping-Cough.—The number of deaths from this disease was 1,002, being 121 under that for the preceding year, and 187 under the average for the 10 years 1892-01. The rate for 1902 is equal to 0·226 per 1,000 of the population, and is 0·036 under the average rate for the previous 10 years, and 0·027 under that for the year 1901. The rates for the provinces were 0·270 per 1,000 for Ulster, 0·250 for Connaught, 0·208 for Munster, and 0·163 for Leinster. Of the total number of deaths 475 were of males and 527 of females. As regards the ages of the deceased, 945 of the 1,002 deaths were of children under 5 years of age. In Belfast County Borough 219 deaths from whooping-cough were registered, in the Dublin Registration Area 60, in Cork County Borough 32, in Waterford County Borough 28, and in the districts containing Sligo Urban District 18.

Diphtheria.—There were 421 deaths from diphtheria registered in Ireland in 1902, being 45 above the number in the preceding year, and 67 over the average for the 10 years 1892-01. The highest number registered in any year since 1864, when registration of deaths came into operation in Ireland, was in 1874, in which year 565 deaths from the disease were registered ; the year 1888 comes next with 447 deaths. From the latter year to 1901 the largest number of deaths registered from this disease was in 1893, when 411 were recorded. The deaths in 1902 represent a rate of 0·095 per 1,000 of the population, as compared with 0·085 for 1901, and 0·078 for the 10 years 1892-01. In Leinster the rate was 0·138 per 1,000, in Ulster it was 0·107, in Munster 0·071, and in Connaught 0·025. Of the 421 deaths, 86 took place in the Dublin Registration Area, and 82 in the County Borough of Belfast. The deaths of males numbered 214 and of females 207. Of the total deaths 237 were of children under 5 years of age, and 107 were of children aged 5 and under 10 years ; the former number is equal to a rate of 0·54, and the latter to a rate of 0·24 per 1,000 of the estimated population at the respective ages.

TABLE XI.—Showing, by Provinces, Counties, &c., the number of Deaths from Influenza at each of five Age-Periods registered in Ireland during the year 1902, with the rate per 10,000 of the population* represented by the deaths at all ages.

G *Diphtheria*

H *Simple Continued Fever*

I *Enteric Fever*

J *Diarrhœal Diseases*

(To face page 15)

Cerebro-spinal Fever.—Of the deaths registered from this disease—66 in number—32 were of males and 34 of females.

Simple-continued Fever.—Fifty-two deaths were assigned to this cause in 1902.

Enteric Fever.—The number of deaths registered during the year 1902 from enteric fever, viz., 613, is the lowest recorded in any year since 1881, and is 216 below the number registered in the year 1901, and 253 below the average for the 10 years 1892-1901. The 613 deaths represent a rate of 0·138 per 1,000 of the estimated population compared with 0·186 for 1901 and 0·191 for the average of the 10 years 1892-1901. The provincial rates were as follows:—For Ulster 0·183 per 1,000, Leinster 0·165 Munster 0·089, and for Connaught 0·059. Of the total deaths 341 occurred in the Registrars' Districts containing Urban Districts having a population of 10,000 and upwards—including 162 in the County Borough of Belfast, 121 in the Dublin Registration Area, 11 in the Districts containing Newry Urban District, 7 in Cork County Borough, 7 in Limerick County Borough, 5 in Waterford County Borough, and 5 in Lisburn Registrar's District.

TABLE XII.—Showing for the year 1902 the Deaths from the several forms of **Fever** at each Age-Period with the proportion to the number of the living at each Age represented thereby.

Diarrhœal Diseases.—Under this head, deaths from epidemic diarrhœa, epidemic (or zymotic) enteritis (214); *diarrhœa, choleraic diarrhœa* (863); and dysentery (53); are included. The total of 1,130 represents a rate of 0·255 per 1·000 of the population, and is 624 under the average for the 10 years 1892-1901, and 562 under the number recorded in 1901. In the districts containing the Urban Districts having a population of 10,000 and upwards, 580 of the deaths from diarrhœal diseases took place, being equal to 0·54 per 1,000 of the population of those districts, and 550, or 0·16 per 1,000, occurred in other parts of the country.

I append a diagram (No 3) showing the death rate from each of the principal epidemic diseases during the twenty years, 1883-1902.

Malarial Fever.—Eight deaths were thus assigned.

Anthrax, Splenic Fever.—One death was registered.

Tetanus.—Forty-two deaths were recorded.

Syphilis.—This disease caused 92 deaths.

Puerperal Septic Diseases.—The deaths from these diseases include 127 from puerperal septicæmia, sapræmia; 5 from puerperal pyæmia; 6 from puerperal phlegmasia dolens; and 82 from *puerperal fever*. The total (220) is 10 under the number recorded in 1901, and 64 under the average for the 10 years 1892-1901.

Other Septic Diseases, Erysipelas, &c.—There were 138 deaths from erysipelas; 79 from septicæmia, sapræmia (not puerperal); 44 from pyaemia (not puerperal); 79 from phlegmon, carbuncle (not anthrax); 2 from phagedæna; and 10 from other septic diseases.

Tuberculosis.—Deaths from tuberculous phthisis (pulmonary tuberculosis) 623, phthisis (not otherwise defined) 8,777, tuberculous meningitis 647, tuberculous peritonitis 411, tabes mesenterica 204, lupus 17, tubercle of other organs 349, general tuberculosis 679, and scrofula 130, are included under this heading. On reference to Table XIII. it will be seen that the total of the deaths from tuberculous disease in its various forms for the year 1902 is 11,837, as against 12,335 in 1901, and an average of 12,716 in the 10 years 1891-1900, and that the rate for 1902 is 2·7 per 1,000, as compared with 2·8 for 1901, and 2·8 for the 10 years 1891-1900. It will also be seen that while the rate for all forms of tuberculous disease in the districts containing Urban Districts having a population of 10,000 and upwards, was 4·1 per 1,000, it was 2·1 per 1,000 in other parts of the country. The highest county rates are Dublin County Borough 4·7 per 1,000, Belfast County Borough 4·0, Dublin County 3·5, Cork County and County Borough 3·0, Waterford County and County Borough 2·9, and Armagh 2·9; and the lowest are :— Cavan 1·5, Roscommon 1·6, and Mayo, Fermanagh, Longford, and Donegal, each 1·7.

Diagram (No. 4) shows the death-rate from tuberculosis in Ireland, as compared with England and Scotland, in each of the years 1864-1902.

The Table XIII. shows the number of deaths from the several forms of tuberculous diseases for the 32 years ending with 1902, with rates and per-centages of deaths from these diseases, &c.

Parasitic Diseases.—Forty-three deaths were attributed to diseases due to the effects of parasites.

Alcoholism, Delirium Tremens.—Of 200 deaths which were stated to be due to alcoholism, delirium tremens, 166 were of males and 34 of females ; the deaths of 7 males and 4 females, who were certified to have died of poisoning by alcohol, are not included in the above. (See Table XV.)

Rheumatism, etc.—Rheumatic fever, acute rheumatism, caused 179 deaths ; rheumatism of the heart 87 ; chronic rheumatism 425 ; rheumatic arthritis, rheumatic gout 65.

Gout.—Thirteen deaths were attributed to gout.

Carcinoma, Sarcoma, Cancer, Malignant Disease.—The number of deaths from these diseases in Ireland in 1902 was 2,861, or 32 under the number for 1901, but 344 over the average for the 10 years 1892-1901. Of the total 587 were attributed to carcinoma, 120 to sarcoma, and 2,154 to cancer, malignant disease. From Table XIV., which shows the deaths from cancer by sexes, ages, and parts affected, it will be seen that the total deaths were equal to a rate of 6·45 per 10,000 of the estimated population—those of the males (1,286) being 5·87 per 10,000 ; and of the females (1,575) 7·03 per 10,000.

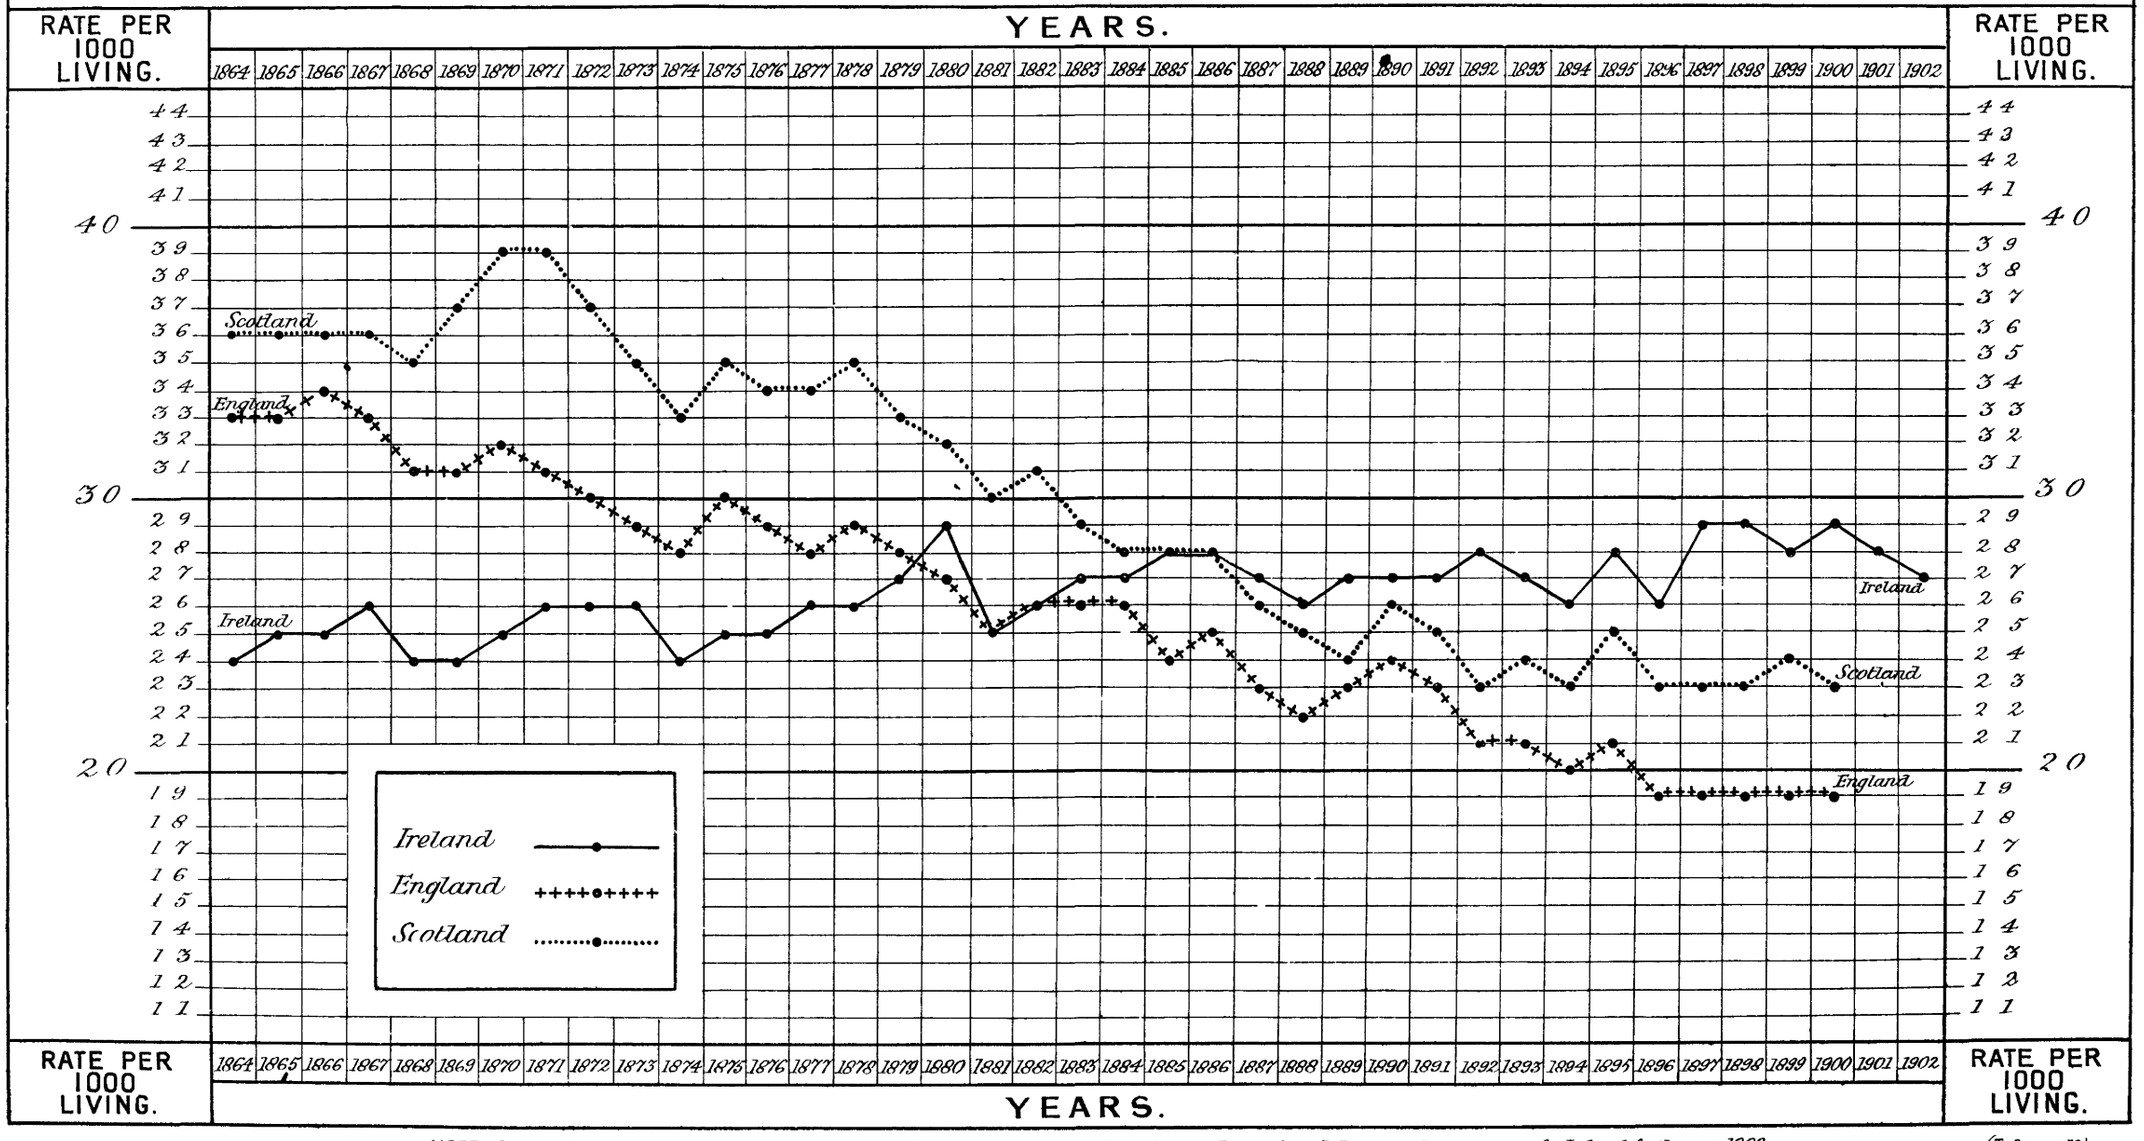
The deaths, from cancer, of males aged 75 years and upwards represent a rate of 40·52 per 10,000 of the male population living at that age period, those of males aged 65 and under 75, a rate of 37·32, those of males aged 55 and under 65, a rate of 21·90, and those of males aged 45 and under 55, a rate of 12·03 per 10,000. As regards the deaths of females, the rate for those aged 65 years and under 75, was 34·19 per 10,000, for those aged 75 and upwards, 32·57, for those aged 55 and under 65, 28·19, and for those aged 45 and under 55, 15·60 per 10,000.

Rickets.—Of 55 deaths which were due to rickets, 49 were those of children under 5 years of age.

Other General Diseases, Group A.—Amongst the deaths from other general diseases are 41 from purpura ; 290 from anæmia, leucocythæmia ; and 288 from diabetes mellitus.

TUBERCULOSIS.

DIAGRAM No 4—Showing the Death-rate in Ireland, as compared with England and Scotland, during each of the thirty-nine Years, 1864—1902



NOTE—*In calculating the Rates for the above Diagram Lupus has not been included in the deaths from Tuberculous Disease, except for Ireland for the year 1902.*

(To face page 16)

TABLE XIII.—Showing the Number of Deaths from the following causes, viz., Tuberculous Phthisis and Phthisis, Tuberculous Meningitis, Tuberculous Peritonitis and Tabes Mesenterica, Other Forms of Tuberculosis, Scrofula, and from all causes, registered in Ireland in each of the thirty-two years 1871–1902, with the Rate per 1,000 of Estimated Population represented by (*a*) Deaths from the above-mentioned forms of Tuberculosis; (*b*) Deaths from All Causes; and the per-centage of total Deaths caused by the tuberculous diseases referred to, the figures for 1902 distinguishing deaths in the Registrars' Districts comprising Towns, which in 1891 or 1901 had 10,000 or more Inhabitants, from those in other parts of the country.

YEARS.	Number of Deaths from				Total Deaths from all the foregoing causes.		Total Deaths from all causes.		Per-centage of Deaths caused by the Diseases named in Columns 2, 3, 4, and 5.
	Tubercul-ous Phthisis and Phthisis.	Tuberculous Meningitis.	Tuberculous Peritonitis and Tabes Mesenterica.	Other Forms of Tuberculosis, Scrofula.	Number.	Rate per 1,000 of Estimated Population.	Number.	Rate per 1,000.

NOTE.—Deaths from Lupus in the year 1902 have been included in the above Table in the deaths from Tuberculous disease; the figures for each of the years 1881-1901 inclusive have been adjusted to include the deaths from Lupus in these years.

LOCAL DISEASES.

I.—*Diseases of the Nervous System.*—There were 4,624 deaths from diseases of the brain and nervous system; these include 1,922 deaths (1,076 males and 846 females) from *convulsions.* Of the total deaths from *convulsions* 1,553 were of children under 1 year old. There were 894 deaths from meningitis, inflammation of brain; 412 from paraplegia and disease of spinal cord; 341 from insanity (not puerperal); 177 from softening of the brain; and 79 from general paralysis of the insane.

II.—*Diseases of Organs of Special Sense.*—Fifty-five deaths were attributed to otitis, mastoid disease; 5 to epistaxis, nose disease; and 5 to ophthalmia, eye disease.

III.—*Diseases of Heart.*—The deaths which were attributed to diseases of the heart were 7,701 in number; of this total 3,790 were of males and 3,911 were of females.

IV.—*Diseases of Blood Vessels.*—Of 3,141 deaths from diseases of blood vessels, 1,518 were those of males, and 1,623 were those of females.

TABLE XIV.—Showing the Deaths registered from Cancer* in Ireland during the Year 1902, by Sexes, Ages, and parts affected.

* Including Carcinoma, Sarcoma, and Cancer, Malignant disease.

V.—*Respiratory System.*—The deaths from diseases of the respiratory system numbered 13,644 (6,980 males and 6,664 females). The total is slightly in excess of the average number for the preceding decade, and is equal to an annual rate of 3·08 per 1,000 of the estimated population. To bronchitis 8,298 deaths were ascribed (3,848 of males and 4,450 of females), and to lobar-pneumonia, broncho-pneumonia, and pneumonia a total of 3,606 deaths (2,151 of males and 1,455 of females).

VI.—*Digestive System.*—The deaths from the various diseases of the digestive system numbered 4,001, of which 2,055 were of males and 1,946 of females. Included in the total there are 212 deaths from gastric ulcer, and 847 deaths from other non-malignant diseases of the stomach; 291 deaths from enteritis (not epidemic); 280 from *gastro-enteritis*; 132 from hernia; 408 from intestinal obstruction; 312 from peritonitis (not puerperal); 317 from cirrhosis of liver; and 514 from other diseases of the liver and gall bladder.

VII.—*Diseases of Lymphatic and Ductless Glands.*—85 deaths were classified in this group.

VIII.—*Diseases of the Urinary System.*—To the diseases in this group there were attributed 1,788 deaths (males 1,135, females 653). Of these 365 were attributed to acute nephritis, uræmia, (215 males and 150 females); and 989 (548 males and 441 females) to chronic Bright's disease, albuminuria. There were 12 deaths due to calculus (stone in the bladder), of which 10 were of males, and 2 were of females.

IX.—*Diseases of the Generative System.*—The deaths tabulated under this heading were 135 in number, 130 being of females and 5 of males. Forty-six of the deaths were from ovarian tumour (not stated malignant), and 30 were from uterine tumour (not stated malignant).

X.—*Diseases of Pregnancy and Childbirth.*—As stated already on page 15 there were 220 deaths from puerperal septic diseases recorded during the year. The diseases classified in the group now under review amounted to 415, making a total of 635 women who succumbed either before, during, or after child-birth, equivalent to a death-rate of 6·2 mothers for every 1,000 births registered.

XI.—*Diseases of the Locomotor System.*—The deaths, 186 in number, comprise 70 from caries, necrosis; 33 from arthritis, periostitis; and 83 from other diseases of the locomotor system.

XII.—*Diseases of the Skin.*—The deaths attributed to diseases of the skin were 112 in number.

Ill-Defined and not Specified Diseases.

This group includes those deaths which were attributed to atrophy, debility, numbering 5,628; old age, 9,810; dropsy, ascites, anasarca, 163; tumour, 15; abscess, 18; hæmorrhage, 7; sudden deaths (causes unascertained), 55; other ill-defined causes, 152; and deaths from causes not specified, 67.

Violent Deaths.

Violence caused 1,785 deaths, of which 1,597 were attributed to accidental causes; 40 were due to homicide; 145 to suicide; and the deaths of 3 men by execution were registered. The total is equal to an annual rate of 0·40 per 1,000 of the population. Among the most numerous causes of accidental deaths, 391 were caused by burns and scalds; 290 by drowning; 242 lives were lost by falls; and 202 were in connection with vehicles and horses. There were 57 deaths from poison registered in 1902, of which 49 were accidental and 8 suicidal. See Table XV., page 20.

Inquests.—The number of inquests held was 2,001—922 in Ulster, 641 in Leinster, 336 in Munster, and 102 in Connaught.

AGES.

Deaths of infants under 1 year old numbered 10,161, being equal to 10·0 per cent. of the number of births registered. The corresponding average per-centage for the preceding ten years was 10·4.

Amongst children under 5 years of age 16,343 deaths occurred—a mortality equal to 37·1 in every 1,000 of the number living at that age. Of these 8,798 were boys and 7,545 girls; the former number representing 39·3 in every 1,000 boys, and the latter 34·9 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 9·3 per cent the number of the living at that age.

Among the deaths registered are 665 of persons stated to have been aged 95 years or upwards—291 males and 374 females; of these 160 (65 males and 95 females) were returned as having been 100 years or upwards. In the absence of public records for remote periods, absolute verification of the ages of very old persons is not obtainable; but secondary inquiries having been made as regards persons returned during some recent years as centenarians, it was found, in almost every instance, that, so far as the Registrars could ascertain, the age was correctly stated.

* Exclusive of *phthisis*, tuberculous phthisis, for which see "General Diseases."

TABLE XV.—Showing the Deaths registered from Poison in 1902, distinguishing the Sex and Age of deceased, the Name of the Poison or Poisonous Gas, and whether Accidental or Suicidal.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants (natives of Ireland) who left Ireland during the year 1902 was 40,190; of these 18,765 were males and 21,425 were females. Of the whole number, 3,694 were from the Province of Leinster; 15,872 from Munster; 9,091 from Ulster; and 11,533 from Connaught.

Of the total emigrants from Ireland in 1902, 8·6 per cent. were under 15 years of age; 81·5 per cent. were between 15 and 35 years old; and 9·9 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The average price of the 4 lb. loaf (1st quality, delivered) in Dublin in the year 1902 was 5½d, against 5¼d. in 1901*. Oatmeal (1st quality) averaged 14s. 10d. per cwt. in Dublin; the average price for 1901 was 13s. 4d.; the average prices of potatoes in Dublin ranged from 2s. 8d. to 3s. 5d. per cwt., against 3s. 0d. to 3s. 8d. in 1901; and those of beef from 55s. 6d. to 59s. 6d. per cwt., against 51s. 6d. to 57s. in 1901.

TABLE XVI.—AVERAGE PRICES in DUBLIN OF BREAD, OATMEAL, POTATOES, and BEEF, during the years 1892-1902, and the AVERAGE NUMBER OF PERSONS IN IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS, and the AVERAGE NUMBER OF PERSONS in RECEIPT OF RELIEF during each quarter of the year 1902.

* Prices derived from returns received from "Bolands, Limited," and "Johnston, Mooney, and O'Brien, Limited."
† Compiled from Returns furnished by the Local Government Board.

Surveying the period covered by several Tables in this Report, *i.e.*, 1902, and the ten years preceding, it is found that beef was lowest in the year 1896, when the average prices ranged from 43*s.* 6*d.* to 54*s.* per cwt., and in 1898, when they ranged from 44*s.* 6*d.* to 53*s.*; bread was cheapest in 1894 and 1895, respectively, when the average price (1st quality, delivered) was 4¾*d.* per 4 lb. loaf. Oatmeal and potatoes were cheapest in 1896, in which year the average price of oatmeal (1st quality) was 12*s.* 7*d.* per cwt.; and the average prices of potatoes ranged from 1*s.* 11*d.* to 2*s.* 11*d.* per cwt. The highest average price of bread was 6¼*d.* per 4 lb. loaf in 1892 and 1898, respectively, and of oatmeal 15*s.* 5*d.* per cwt. in 1892; the highest range for potatoes was from 3*s.* 4*d.* to 4*s.* 7*d.* per cwt. in 1900, and for beef, from 55*s.* 6*d.* to 59*s.* 9*d.* per cwt. in 1902.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1902 was 43,132, being 746 over the average for the preceding year; and that the average number of persons receiving out-door relief was 57,921, or 351 above the corresponding number for 1901.

THE WEATHER.

The following particulars and those given on pages 171-187, which are inserted by the kind permission of the Editor of the "Dublin Journal of Medical Science," have been derived from Returns of Meteorological Observations taken in Dublin City by Sir John W. Moore, B.A., M.D., UNIV. DUB., F.R.C.P.I., F.R. MET. SOC.; and published in the Journal during the years 1902-1903. The Tables on pages 188-190, also, are founded on Sir John Moore's observations.

The mean Atmospherical Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least 01 inch of rain falls within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1902 was 29·937 inches. The highest observed reading was 30·897 inches at 9 A.M. on January 31st. The lowest observed reading was 28·847 inches, at 3·40 P.M. on March 24th. The extreme range of atmospherical pressure was 2·050 inches compared with 2·008 inches in 1901.

The *Mean Temperature* of the air for the year was 50·0°. The highest reading was 74·8° on July 13th, the lowest reading was 22·0° on February 12th. The average mean temperature for the years 1882-1901 was 49·4°. The mean temperature deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M. was 49·0°.

Rain fell on 203 days, including snow or sleet on 13 days and hail on 21 days. The average annual number of rainy days in the years 1882-1901 was 195·0. The total rainfall measured 29·375 inches, compared with an average of 27·330 inches in the twenty years 1882-1901. During the first half of 1902 (January to June, inclusive) the rainfall was 12·344 inches on 98 days; during the second half (July to December, inclusive) 17·031 inches fell on 105 days.

As regards the *Direction of the Wind*, 730 observations were made during the year, with this result—N., 45; N.E., 70; E., 83; S.E., 71; S., 61; S.W., 92; W., 185; N.W., 102; Calms, 21.

I have the honour to be,

Your Excellency's faithful servant,

ROBERT E. MATHESON,

Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 24th July, 1903.

MARRIAGES, BIRTHS, and DEATHS *registered* in the Year 1902.

I.—PROVINCE OF LEINSTER.—MARRIAGES, BIRTHS AND DEATHS, 1902.

SUPERINTENDENT REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES *

Wherever the minus sign (—) is prefixed to the number given in the column headed "Excess of Births over Deaths," it denotes that the births, instead of exceeding the deaths, were, in fact, *less than the Deaths* to the extent stated.

No.	SUPERINTENDENT REGISTRARS' DISTRICTS.	AREA in Statute Acres.	Population, 1901.	TOTAL.			BIRTHS.				DEATHS.		Excess of Births over Deaths.

NOTE.—The Registrars' Districts are subdivisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances. See note pp. 26-7.

The letter *W.* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births, instead of exceeding the deaths, were, in fact, *less than the deaths* to the extent stated.

BIRTHS AND DEATHS Registered in the Year 1902.—REGISTRARS' DISTRICTS arranged by COUNTIES and SUPERINTENDENT REGISTRARS' DISTRICTS—*continued.*

NOTE.—This Table has been constructed for the years 1828 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841 according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over census numbers for 1861 and 1871 as explained for the last period.

1872–1902—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and the number of emigrants, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

AGES of the POPULATION IN IRELAND according to the Census Returns of 1861, 1871, 1881, 1891, and 1901.

METEOROLOGICAL OBSERVATIONS

FOR EACH MONTH OF THE YEAR 1902.

By SIR JOHN W. MOORE, B A, M.D, UNIV. DUB., F.R.C.P.I., F.R. MET. SOC.

(Extracted from the *Dublin Journal of Medical Science*).

JANUARY.—A very mild, open month, with high atmospheric pressure, predominant W and S.W. winds, and a moderate rainfall. More than one-third (·692 inch) of the whole precipitation for the month occurred on the 10th in connection with a complex depression which formed over Ireland, and in which the wind suddenly shifted from W.S.W. to N.E. A resplendent sunrise on the 9th preceded this disturbance. The first frost of the month in Dublin did not occur until the 14th, and was quite a passing chill. A persistent "cold snap" began on the 24th with showers of hail, sleet, and snow, and lasted to the close of the month.

The mild weather was connected with the passage eastward across Northern Europe of a series of very large and deep atmospheric depressions, whereas an area of high barometer (anticyclone) hung over France and the Southern part of the British Isles. Between Sunday, the 26th, and Friday, the 31st, a remarkable change in atmospheric pressure took place in North-western Europe. On the former day the barometer was below 29 inches over nearly the whole of Norway, Sweden, and Denmark. On the morning of the latter day the barometer rose to 31 inches and upwards all over Scotland, and in the S.W. of Norway. At 8 a.m. of the 31st Aberdeen reported 31·05 inches, and Skudesnæs 31·06 inches as the readings of the barometer, corrected and reduced. At 10 p.m. of the 31st the still higher value of 31·11 inches was recorded at Nairn.

The duration of bright sunshine was estimated at 54 hours, the daily average being 1·7 hours. The corresponding values for January, 1901, were 64 hours and 2·1 hours.

In Dublin the arithmetical mean temperature (43·0°) was above the average (41·4°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 42·4°. In the thirty-seven years ending with 1901, January was coldest in 1881 (M. T. = 33·2°), and warmest in 1898 (M. T. = 47·8°). In 1901 the M. T. was 41·9°.

The mean height of the barometer was 30·117 inches, or 0·243 inch above the corrected average value for January—namely, 29·874 inches. The mercury rose to 30·897 inches at 9 a.m. of the 31st, and fell to 28·958 inches at 9 p.m. of the 1st. The observed range of atmospheric pressure was, therefore, 1·939 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 42·4°, or 1·5° above the value for January 1901. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·52), the M. T. becomes 43·2°, compared with a twenty-five years' average of 41·5°. The arithmetical mean of the maximal and minimal readings was 43·0°, compared with a twenty-five years' average of 41·4°. On the 3rd the thermometer in the screen rose to 55·6°—wind, W.S.W.; on the 30th the temperature fell to 26·9°—wind, calm. The minimum on the grass was 22·7° on the 30th.

The rainfall was 1·614 inches, distributed over 12 days. The average rainfall for January in the twenty-five years, 1865-89, inclusive, was 2·200 inches, and the average number of rainy days was 17·3. The rainfall, therefore, and rainy days were considerably below the average. The record rainfall for January was in 1895—namely, 5·711 inches on 24 days. In 1876, only ·406 inch was measured on but 9 days. In 1901, 2·672 inches fell on 17 days.

The atmosphere was foggy on the 10th, 14th, 17th, 18th, 26th, and 30th. High winds were noted on 13 days, reaching the force of a gale on 3 days—the 1st, 4th, and 31st. Snow or sleet fell on the 24th, 25th, 26th, and 29th; hail on the 24th only. Temperature exceeded 50° in the screen on 10 days; while it fell to 32° in the screen on 7 nights, compared with 3 nights in 1901, 2 in 1900, 4 in 1899, only 1 night in 1898, 13 nights in 1897, only 3 in 1896, 18 in 1895, 7 in 1894, 4 in 1893, and 15 in 1892. The minima on the grass were 32° or less on 12 nights, compared with 11 nights in 1901, 13 nights in 1900, 16 in 1899, only 3 in 1898, 21 in 1897, 8 in 1896, 29 in 1895, 17 in 1894, 16 in 1893, and 25 in 1892.

In Dublin the rainfall up to January 31st, 1902, amounted to 1·614 inches on 12 days, compared with 2·672 inches on 17 days in 1901, 2·579 inches on 27 days in 1900, 2·483 inches on 24 days in 1899, 1·786 inches on 14 days in 1898, 2·694 inches on 17 days in 1897, only ·720 inch on 14 days in 1896, and with a twenty-five years' average (1865-1889) of 2·200 inches on 17·3 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 1·860 inches on 9 days, compared with 4·035 inches on 16 days in 1901, 3·766 inches on 24 days in 1900, 4·395 inches on 24 days in 1899, 2·345 inches on 13 days in 1898, 3·660 inches on 20 days in 1897, and only ·485 inch on 7 days in 1896. The heaviest falls in 24 hours were ·650 inch on the 10th, and ·460 inch on the 1st.

At Cloneevin, Killiney, Co. Dublin, the rainfall was 1·62 inches on 12 days, ·64 inch being measured on the 10th. The average fall in January for the 17 years, 1885-1901, was 2·356 inches on 17·2 days. In 1895 the rainfall was 5 93 inches on 24 days, in 1896, ·70 inch on 9 days, in 1897, 3·08 inches on 20 days, in 1898, 1·58 inches on 13 days, in 1899, 2·93 inches on 22 days, in 1900, 2·82 inches on 25 days, and in 1901, 2·83 inches on 15 days.

Dr. B. H. Steede writes that at the National Hospital for Consumption, Newcastle, Co. Wicklow, rain fell to the amount of 1 666 inches on 12 days, the maximal falls in 24 hours being ·442 inch on the 10th, and 416 inch on the 1st. The shade thermometers rose to 54 0° on the 3rd, and fell to 28 5° on the 29th. In January, 1899, the rainfall at this Second Order Station was 4·760 inches on 23 days; in 1900, 3 810 inches on 28 days; in 1901, 3 541 inches on 14 days.

At the Railway Hotel, Recess, Connemara, County Galway, the rainfall in January amounted to 5 842 inches on 21 days, compared with 6 623 inches on 27 days in 1900, and 4 691 inches on 19 days in 1901. The maximal fall in 24 hours was ·830 inch on the 1st. Snow and hail fell on the 28th.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, the rainfall was 2·28 inches on 14 days, ·86 inch being measured on the 10th. Sleet, snow, and hailshowers occurred on the 24th. The mean shade temperature was 40 6°, the extreme readings being —highest, 54°, on the 3rd; lowest, 28°, on the 30th and 31st.

Dr. J. Byrne Power, F. R. Met. Soc., D.P.H., Medical Superindentent Officer of Health, reports that at Kingstown, Co. Dublin, the mean temperature for the month of January was 43 8°, the extremes being—highest, 56 5°; lowest, 28·0°. At Bournemouth the mean was 42 8°, the extremes being—highest, 53·0°; lowest, 28 0°. The mean daily range was 8·8° at Kingstown, and at Bournemouth 9 6°. The mean temperature of the sea at Sandycove bathing-place was 44 0°. The rainfall at Kingstown was 1 48 inches on 10 days, while at Bournemouth it was 0 95 inch on 11 days. The duration of bright sunshine was 61·5 hours at Kingstown, 42·5 hours at the Ordnance Survey Office, Phœnix Park, 39·4 hours at Valentia, and 50·5 hours at Eastbourne.

FEBRUARY.—For the third time in succession February proved a cold month and distinctly colder than January. On this occasion the mean temperature of the air in Dublin was as much as 4·2° below that of January. The "cold snap" which set in on January 24th lasted in Ireland until the 21st, but in England until the 26th. Consequent on a violent snowstorm in Ulster on the 7th, temperature became unusually and persistently low. The area of most intense cold was found in the County Tyrone, for at Edenfel, Omagh, the mean temperature of the week ended Saturday, February 15, was only 22 1°, or 16·9° below the average. At that station the actual minimum in the screen was 4° on the early morning of Friday, the 14th. Even lower readings were reported from Scotland—namely, zero from Braemar, and minus 2 from Lairg, in Sutherlandshire. On and after the 15th a mild southerly air-current was in conflict with the cold air lying over Western Europe, and about the 21st the temperature rose above the average in Ireland, so continuing to the end of the month. Had it not been for this warm spell, February, 1902, would have been exceptionally cold. Even in Dublin the mean temperature of the week ended the 15th was as low as 31·4°; the mean dry-bulb readings at 9 a.m. and 9 p.m. being only 29·3°. The duration of bright sunshine was estimated at 79¼ hours, or a daily average of 2·8 hours.

In Dublin the mean temperature (39·3°) was 3·5° below the average (42·8°). The mean dry-bulb readings at 9 a.m. and 9 p.m. were 38·2°. In the thirty-seven years ending with 1901, February was coldest in 1895 (M. T. = 34·2°), and warmest in 1869 (M. T. = 46·7°). In 1900 the M. T. was 37·9°; in 1901 it was 39 2°.

The mean height of the barometer was 29 815 inches, or 0·040 inch below the average value for February—namely, 29 855 inches. The mercury was as high as 30·825 inches at 9 a.m. of the 1st, and fell to 28·950 inches at 11 p.m. of the 26th. The observed range of atmospheric pressure was, therefore, 1 875 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 38·2°, or no less than 4 2° below the value for January, 1902. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·50), the M. T. is 39 3°, compared with a twenty-five (1865-1889) years' average of 42·8°. On the 28th the thermometer in the screen rose to 54 4°—wind, S.W.; on the 12th the temperature fell to 22 0°—wind, W.N.W. The minimum on the grass was 20 0° also on the 12th.

The rainfall was 1·748 inches, distributed over 10 days. The average rainfall for February in the twenty-five years, 1865-89, inclusive, was 2·150 inches, and the average number of rainy days was 17·2. The rainfall, therefore, and particularly the rainy days, were much below the average. In 1883 the rainfall in February was large—3·752 inches on 17 days; in 1879 also 3·706 inches fell on 23 days. On the other hand, in 1891, only ·042 inch was measured on but 2 days.

The atmosphere was foggy on 10 days—the 4th, 5th, 6th, 7th, 8th, 10th, 13th, 15th, 17th, and 18th. The amount of cloud—62·4 per cent.—was below the average—66 per cent. High winds were noted on 6 days, and reached the force of a gale on the 1st, 2nd, and 26th. Hail fell on the 8th. Snow or sleet fell on the 7th and 8th. A lunar halo was seen on the 15th. There was a fine lunar rainbow shortly after 9 p.m. of the 23rd.

The temperature reached or exceeded 50° in the screen on five days, and it fell below 32° on 10 nights, compared with as many as 18 nights in 1895, only one night in 1896, 7 nights in 1898, 4 nights in 1899, 12 nights in 1900, and 9 nights in 1901. The minima on the grass were 32° or less on 11 nights, compared with every night in 1895, 21 nights in 1900, and 17 in 1901. The thermometer failed to rise to 40° in the screen on 7 days. On the 11th the maximum was only 32·8°.

In Dublin the rainfall up to February 28th, 1902, amounted to 3·362 inches on 22 days, compared with 3·872 inches on 29 days in 1901, 5·735 inches on 50 days in 1900, 4·651 inches on 39 days in 1899, only ·714 inch on 16 days in 1891, and a twenty-five years' (1865-1889) average of 4·350 inches on 34·5 days.

At Knockdolian, Greystones, Co. Wicklow, 2·590 inches of rain fell on 8 days. The heaviest fall in 24 hours was ·635 inch on the 26th. In February, 1900, the fall was 6·670 inches on 20 days; in 1901, 1·385 inches on 11 days. The total fall to February 28th, 1902, inclusive, was 4·450 inches on only 17 days, compared with 5·420 inches on 27 days in 1901, 10·436 inches on 44 days in 1900, 8·610 inches on 42 days in 1899, 3·980 inches on 29 days in 1898, 5·190 inches on 37 days in 1897, and only 1·940 inches on but 17 days in 1896.

The rainfall at Cloneevin, Killiney, Co. Dublin, amounted to 2·35 inches on 12 days. Snow fell on the 8th and 13th. The average rainfall for February during 17 years (1885-1901) at this station is 1·754 inches on 13·8 days. The greatest rainfall in 24 hours was ·63 inch on the 26th. Since January 1 the rainfall was 3·97 inches on 24 days, compared with 4·39 inches on 28 days in 1901, 7·23 inches on 48 days in 1900, 6·28 inches on 36 days in 1899, 3·32 inches on 29 days in 1898, 4·31 inches on 38 days in 1897, and 1·64 inches on 19 days in 1896.

At the Railway Hotel, Recess, Connemara, Co. Galway, the rainfall was 3·196 inches on 12 days, compared with only 1·748 inches on 11 days in February, 1901, and 3·786 inches on 17 days in February, 1900. The maximal fall in 24 hours was ·552 inch on the 21st. The month was generally fine at Recess, with severe frost from the 8th to the 14th. Glendalough was frozen, the ice being 1½ inches thick.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, rain fell on 11 days to the amount of 2·76 inches, the greatest daily fall being 1·38 inches on the 26th. In February, 1901, the rainfall was 1·55 inches on 10 days. The temperature in the shade ranged from 22° on the 12th to 52° on the 28th. The mean temperature in the screen was 39·0°.

From Dr. B. H. Steede we learn that the rainfall at the National Hospital for Consumption, Newcastle, Co. Wicklow, was 2·923 inches on 10 days, compared with 5·929 inches on 20 days in February, 1900, and 1·296 inches on 11 days in 1901. The maximal fall in 24 hours was ·576 inch on the 22nd, but ·556 inch also fell on the 26th, and ·510 inch on the 23rd. Up to February 28th the rainfall at Newcastle amounted to 4·589 inches on 22 days, compared with 4·837 inches on 25 days in the corresponding period of 1901. At this Second Order Station the screened thermometers fell to 25·4° on the 12th, and rose to 53·0° on the 28th.

Dr. J. Byrne Power, D.P.H., Medical Superintendent Officer of Health for Kingstown, Co. Dublin, writes:—The mean temperature at Kingstown for the month of February was 39·3°, the extremes being—highest, 56·0°; lowest, 22·5°. At Bournemouth the mean was 36·2°, the extremes being—highest 50°; lowest, 23°. The mean daily range was 8·1° at Kingstown, and at Bournemouth 8·6°. The rainfall at Kingstown was 2·05 inches on 11 days, and at Bournemouth it was 1·50 inches on 11 days. The frost set in at Bournemouth on the 8th and lasted for 11 days, while at Kingstown it lasted for only 7 days. The temperature of the sea at Sandycove Bathing Place on the 9th, when the frost set in, was 40°, from the 13th to the 15th it was 39°, it rose again to 40° on the 16th, and on the 28th it was 44°. The duration of bright sunshine was—at Kingstown 74·2 hours, at the Ordnance Survey Office, Phœnix Park, 84·6 hours, at Valentia 82·2 hours, at Southport 58·1 hours, and at Eastbourne 72·1 hours.

March.—Unlike March in the two preceding years, 1900 and 1901, March in 1902 was singularly mild—the mean temperature being 3·6° above the average, and the only cold spell occurring between the 20th and the 26th, inclusive. At first also the weather was dry, but from the 8th onwards rain fell frequently, though not heavily, except on the 24th (·366 inch) and 26th (·268 inch). W. and S.W. winds were by far the most prevalent. Bright sunshine was estimated to last 94 hours, compared with 132½ hours in March, 1901, and only 84 hours in March, 1900. The daily average of bright sunshine was 3 hours compared with 4·27 in March, 1901. A notable phenomenon was a sun-pillar which appeared on the late afternoon of the 6th in a thin stratum of cirriform cloud. It was still seen long after sunset, and was visible not only in Dublin but also in Cornwall and Wiltshire.

In Dublin the arithmetical mean temperature (46·7°) was 3·6° above the average (43·1°). The mean dry-bulb readings at 9 a.m. and 9 p.m. were 45·4°. In the thirty-seven years ending with 1901, March was coldest in 1867 and 1883 (M. T. = 39·0°), and warmest in 1893 (M. T. = 48·1°). In 1901 the M. T. was 41·9°.

The mean height of the barometer was 29·785 inches, or 0·131 inch below the corrected average value for March—namely, 29·916 inches. The mercury rose to 30·196 inches at 9 p.m. of the 16th, and fell to 28·847 inches at 3-40 p.m. of the 24th. The observed range of atmospheric pressure was, therefore, 1·349 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 45·4°. Using the formula, *Mean Temp.* = *Min.* + (*Max*—*Min.* × ·485), the M. T. becomes 46·5°. The arithmetical mean of the maximal and minimal readings was 46·7°, com-

pared with a twenty-five years' average of 43·1°. On the 17th the thermometer in the screen rose to 58·7°—wind, S.W.; on the 24th the temperature fell to 32·8°—wind, S.E. The minimum on the grass was 29·4°, also on the 24th.

The rainfall was 1·752 inches, distributed over 21 days. The average rainfall for March in the twenty-five years, 1865-89, inclusive, was 2·061 inches, and the average number of rainy days was 16·5. The rainfall, therefore, was below, while the rainy days were above, the average. In 1867 the rainfall in March was very large—4·972 inches on 22 days. On the other hand, the smallest March rainfall was ·288 inch on 8 days in 1893. In 1900, only ·963 inch fell on 13 days. In 1901 the rainfall was 1·784 inches on 17 days.

The atmosphere was more or less foggy in the city on 6 days—viz., the 5th, 6th, 13th, 14th, 16th, and 30th. High winds were noted on 10 days, only once reaching the force of a gale—on the 19th. Snow or sleet occurred on the 20th, 21st, and 24th; hail also fell on the 20th, 22nd, 23rd, 25th, and 30th. Temperature exceeded 50° in the screen on 23 days, compared with only 6 days in 1901, only 5 days in 1900, 19 days in 1899, 9 in 1898, 14 in 1897, 21 in 1896, 13 in 1895, 22 in 1894, 26 in 1893, and only 7 in 1892. It never fell to 32° in the screen. The minima on the grass were 32° or less on 5 nights, compared with 11 nights in 1901, 14 nights in 1900, 13 in 1899, 15 in 1898, 9 in 1897, 8 in 1896, 10 in 1895, 12 each in 1894 and 1893, and 25 in 1892. The thermometer never failed to reach 45°. A lunar halo was seen on the 15th, a solar halo on the 26th, and a "sun-pillar" on the afternoon of the 6th, from 5 to 6-20 p.m.

The rainfall in Dublin during the three months ending March 31st amounted to 5·114 inches on 43 days, compared with 5·656 inches on 46 days in 1901, 6·698 inches on 63 days in 1900, only 1·650 inches on but 32 days in 1891, and a twenty-five years' (1865-1889 inclusive) average of 6·411 inches on 51·0 days.

At Knockdolian, Greystones, Co. Wicklow, 1·660 inches of rain fell on 17 days. The corresponding figures for March, 1900, are 1·320 inches of rain on 14 days, and for 1901, 1·840 inches on 14 days. The maximal fall in 24 hours was ·530 inch on the 24th. The total rainfall since January 1, 1902, equals 6·110 inches on 34 days, compared with 11·756 inches on 58 days in the first quarter of 1900, and 7·260 inches on 41 days in the same period of 1901.

Dr. B. H. Steede, M.D., D.P.H., reports that at the National Hospital for Consumption, Newcastle, Co. Wicklow, the rainfall was 1·417 inches on 19 days, compared with 1·798 inches on 14 days in 1901, ·892 inch on 12 days in 1900, and 1·054 inches on 9 days in 1899. On the 24th ·384 inch fell, and on the 26th ·340 inch. The total rainfall at this station from January 1st to March 31st, inclusive, was 6·006 inches on 41 days, compared with 6·635 inches on 39 days in the first quarter of 1901, 10·631 inches on 57 days in that of 1900, 9·929 inches on 48 days in that of 1899, 4·767 inches on 40 days in that of 1898, and 10·086 inches on 57 days in that of 1897. The extremes of temperature were:—Highest, 57·0° on the 29th; lowest, 33·0° on the 24th.

The rainfall at Cloneevin, Killiney, Co. Dublin, was 1·50 inches on 21 days, compared with 1·57 inches on 17 days in 1901, ·94 inch on 14 days in 1900, ·67 inch on 9 days in 1899, and a seventeen years' (1885-1901) average of 1·778 inches on 15·3 days. The maximum in the 17 years was 3·59 inches in 1888, the minimum was ·26 inch in 1893. The heaviest fall in 24 hours was ·50 inch on the 24th. At this station the total rainfall since January 1st was 5·47 inches on 45 days, compared with a fall of 8·17 inches on 62 days in the first quarter of 1900, and one of 5·96 inches on 45 days in that of 1901.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, rain fell to the amount of 1·98 inches on 18 days, compared with 2·20 inches on 13 days in March, 1901, the greatest daily rainfall being ·44 inch on the 24th. The temperature in the shade ranged from 57° on the 17th to 34° on the 24th. The mean shade temperature was 46·4° compared with 41·2° in 1901. Since January 1st, 1902, the rainfall at this station amounts to 7·02 inches on 43 days, compared with 6·71 inches on 40 days in the first quarter of 1901.

At the Railway Hotel, Recess, Connemara, Co. Galway, the rainfall was 5·860 inches on 20 days, compared with 4·295 inches on 14 days in 1901, and 1·311 inches on 13 days in 1900. The maximal falls in 24 hours were ·770 inch on the 20th, and ·700 inch on the 23rd. Hail fell on the 19th and two following days, and on the 22nd there was a brief but heavy snowstorm, followed by sleet and rain.

Dr. J. Byrne Power, F.R. Met. Soc., D.P.H., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that at that station the mean temperature for March was 46·8°, the extremes being—highest, 60°; lowest, 33·5° At Bournemouth the mean was 45·9°, the extremes being—highest, 61°; lowest, 31°. The mean daily range was 10° at Kingstown, and at Bournemouth 12·3°. The mean temperature of the sea at Sandycove bathing-place was 45°. The rainfall at Kingstown was 1·57 inches on 18 days, and at Bournemouth it was 2·27 inches on 10 days. The duration of bright sunshine was 103·8 hours at Kingstown, 102·8 at the Ordnance Survey Office, Phœnix Park, 85·7 at Parsonstown, 96·8 at Valentia, 100·7 at Southport, and 115·6 hours at Eastbourne.

April.—April, 1902, was a distinctly cold month. The mean temperature, it is true, fell short of the average by only 0·6°, but this was due to a comparatively high day-temperature in consequence of the large percentage of bright sunshine. The fact remains, that April was only 0·4° warmer than March—the seasonal advance of temperature being practically at a standstill. Winds from polar quarters predominated, and the amount of cloud was singularly small—only 45·2 per cent., at 9 p.m. only 37·0 per cent. The consequence was a large diurnal range of temperature, sharp nights alternating with bright, sunny, and tolerably warm

days. The duration of bright sunshine was estimated at 199½ hours, compared with 205 hours in April, 1901. The daily average duration of sunshine was 6·7 hours. On the afternoon of Monday, the 28th, a splendid display of rainbow-coloured solar halos was seen in Dublin.

In Dublin the arithmetical mean temperature (47·1°) was 0·6° below the average (47·7°). The mean dry-bulb readings at 9 a.m. and 9 p.m. were 45·9°. In the thirty-seven years ending with 1901, April was coldest in 1879 (the cold year) (M. T.=44·5°), and warmest in 1893 (M. T.=51·4°).

The mean height of the barometer was 29·919 inches, or 0·069 inch above the average value for April—namely, 29·850 inches. The mercury rose to 30·340 inches at 9 a.m. of the 29th, having fallen to 29·112 inches at 9 a.m. of the 22nd. The observed range of atmospheric pressure was, therefore, 1·228 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 45·9°, or only 0·5° above the value for March, 1902. Using the formula, *Mean Temp.*=*Min.*+(*Max.*—*Min.*×·476), the value is 46·7°, or 0·7° below the average mean temperature for April, calculated in the same way, in the twenty-five years, 1865-89, inclusive (47·4°). The arithmetical mean of the maximal and minimal readings was 47·1°, compared with a twenty-five years' (1865-1889, inclusive) average of 47·7°. On the 24th the thermometer in the screen rose to 61·7°—wind, S.S.W.; on the 10th the temperature fell to 33·0°—wind, N.E. The minimum on the grass was 29·9°, also on the 10th.

The rainfall was 2·061 inches, distributed over 16 days, but of this amount 1·068 inches, or 51·8 per cent., fell on the 4th and 21st. The average rainfall for April in the twenty-five years, 1865-1889, inclusive, was 2·055 inches, and the average number of rainy days was 15·2. The rainfall and the rainy days, therefore, were about the average. In 1877 the rainfall in April was very large—4·707 inches on 21 days. On the other hand, in 1873, only ·498 inch was measured on 8 days. In 1901, only ·864 inch fell on 12 days.

Fog was observed on the 5th, 9th, 10th, 11th, and 25th. High winds were noted on 12 days, reaching the force of a gale on the 3rd and 22nd. Hail fell on the 3rd, 12th, and 13th; snow and sleet on the 3rd. The temperature rose above 60° in the screen on only one day (the 24th). It failed to reach 50° on 7 days. It never fell to 32° in the screen, but on 7 nights it fell to or below 32° on the grass. The mean lowest temperature on the grass was 36·8°, compared with 37·3° in 1901, 39·0° in 1900, 37·8° in 1899, 40·2° in 1898, 37·7° in 1897, 40·6° in 1896, 37·8° in 1895, 40·0° in 1894, 38·2° in 1893, 32·4° in 1892, 34·1° in 1891 and 1890, 34·4° in 1889, 34·6° in 1888, and 31·6° in 1887. Solar halos were seen on the 25th, 28th, and 29th—the display on the 28th being particularly fine.

The rainfall in Dublin during the four months ending April 30th amounted to 7·175 inches on 59 days, compared with 6·520 inches on 58 days in 1901, 8·002 inches on 79 days in 1900, 7·557 inches on 71 days in 1899, 7·236 inches on 64 days in 1898, 9·554 inches on 79 days in 1897, 5·781 inches on 63 days in 1896, 10·233 inches on 65 days in 1895, only 3·203 inches on 46 days in 1891, and a twenty-five years' average of 8·466 inches on 66·2 days.

Dr. B. H. Steede, M.D., D.P.H., reports that at the National Hospital for Consumption, Newcastle, Co. Wicklow, the rainfall was 3·017 inches on 13 days, compared with 1·830 inches on 17 days in 1901. The heaviest falls in 24 hours were ·702 inch on the 4th and 1·070 inches on the 21st. Since January 1st, 1902, 9·023 inches of rain have been measured on 54 days. The maximal shade temperature was 56·2° on the 29th, the minimal reading was 31·2° on the 7th.

At Knockdolian, Greystones, Co. Wicklow, the rainfall amounted to 3·105 inches on 14 days, compared with 2·800 inches on 15 days in April, 1901. The heaviest falls in 24 hours were ·830 inch on the 4th, and 1·030 inches on the 21st. The total rainfall in 1902, up to April 30th, was 9·215 inches on 48 days, compared with 10·060 inches on 56 days in 1901, 13·191 inches on 70 days in 1900, 12·380 inches on 70 days in 1899, 8·890 inches on 56 days in 1898, 13·080 inches on 80 days in 1897, and 5·686 inches on 50 days in 1896.

At Cloneevin, Killiney, Co. Dublin, 2·61 inches of rain fell on 14 days. The maximal fall in 24 hours was ·88 inch on the 21st. Sleet and hail fell on the 3rd. The average rainfall in April of the seventeen years, 1885-1901, was 1·792 inches on 14·5 days. Since January 1st, 1902, 8·08 inches of rain fell at this station on 59 days, compared with 7·62 inches on 59 days in 1901, 9·23 inches on 77 days in 1900, 9·02 inches on 65 days in 1899, 7·74 inches on 61 days in 1898, 10·36 inches on 83 days in 1897, 5·27 inches on 55 days in 1896, 11·28 inches on 66 days in 1895, 9·09 inches on 74 days in 1894, and 6·94 inches on 57 days in 1893.

Dr. Arthur S. Goff reports the rainfall at Lynton, Dundrum, Co. Dublin, as 2·63 inches on 16 days, compared with 1·19 inches on 12 days in April, 1901, the greatest daily rainfall being ·65 inch on the 21st. The mean shade temperature was 46·6° compared with 48·3° in 1901. The thermometric range was from 33° on the 10th, to 60° on the 24th.

Dr. J. Byrne Power, D.P.H., Medical Superintendent Officer of Health for the Urban District of Kingstown, Co. Dublin, reports that the mean temperature for the month of April at that station was 46·9°, the extremes being—highest, 59°; lowest, 33·5°. At Bournemouth the mean was 45·9°—highest, 64°; lowest, 31°. The mean daily range at Kingstown was 11·6°, and at Bournemouth 12·3°. The mean temperature of the sea at Sandycove Bathing Place was 47·5°. The rainfall at Kingstown was 2·27 inches on 14 days, the amount at Bournemouth being the same. Easterly winds prevailed on 17 days during April at Bournemouth as well as at other stations on the south coast of England, but on only 15 days at Kingstown. The duration of bright sunshine at Kingstown was 195·5 hours, whereas it was 210·8 hours at the Ordnance Survey Office, Phœnix Park, 166·4 at Valentia, 201·5 at Parsonstown, 212·7 at Southport, and 176.2 at Eastbourne.

MAY.—May, 1902, was the converse of its namesake in 1901, which had been bright, dry and seasonably warm, for it proved dull, showery and unseasonably cold. The amount of cloud was 66 8 per cent., or more than double the figure for May, 1901—namely, 33·1 per cent. The estimated duration of bright sunshine also was only 178¾ hours, or a daily mean of 5⅘ hours compared with 302¼ hours, or a daily mean of 9¾ hours, in May, 1901. Northerly and north-westerly winds showed a remarkable predominance. So cold a May had not been experienced in Dublin since 1869.

In Dublin the arithmetical mean temperature (49·9°) was much below the average (52·0°). The mean dry-bulb readings at 9 a.m. and 9 p.m. were 48·8°. In the thirty-seven years ending with 1901, May was coldest in 1869 (M. T. = 48·2°), and warmest in 1893 (M. T. = 56·7°). In 1901 the M. T. was 53·6°.

The mean height of the barometer was 30·023 inches, or 0·034 inch above the corrected average value for May—namely, 29·989 inches. The mercury rose to 30·503 inches at 9 a.m. of the 25th, and fell to 29·224 inches at 2 p.m. of the 17th. The observed range of atmospheric pressure was, therefore, 1·279 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 48·8°, or 2·9° above the value for April, 1901—45·9°. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·47), the value is 49·5°, or 2·1° below the average mean temperature for May, calculated in the same way, in the twenty-five years, 1865-89, inclusive (51·6°). The arithmetical mean of the maximal and minimal readings was 49·9°, compared with a twenty-five years' average of 52·0°. On the 24th the thermometer in the screen rose to 67·9°—wind, W.; on the 7th the temperature fell to 36·0°—wind, N. The minimum on the grass was 32·8°, also on the 7th.

The rainfall amounted to 2·798 inches, distributed over 22 days. The average rainfall for May in the twenty-five years, 1865-1889, inclusive, was 2·030 inches, and the average number of rainy days was 15·4. The rainfall and especially the rainy days were thus much above the average. In 1886 the rainfall in May was very large—5·472 inches on 21 days; in 1869, also, 5·414 inches fell on 19 days. On the other hand, in 1895 only ·177 inch was measured on but 3 days. In 1896 the fall was only ·190 inch on 7 days. In 1901, 1.204 inches fell on 9 days.

Solar halos appeared on the 10th, 16th, 25th and 29th. High winds were noted on 7 days, but attained the force of a gale on only one occasion—the 16th. Hail fell on the 2nd, 3rd, 7th, 17th, 18th and 19th. Thunder and lightning occurred on the 17th.

During the month the thermometer did not fall below 32° in the screen or on the grass. The mean minimal temperature on the grass was 40·3°, compared with 41·7° in 1901, 41·6° in 1900, 40·6° in 1899, 42·9° in 1898, 40 9° in 1897, 43·1° in 1896, 41·8° in 1895, 37·6° in 1894, and 45·6° in 1893. The maximum reached or exceeded 60° on only 5 days, but never fell short of 50°.

The rainfall in Dublin during the five months ended May 31st amounted to 9·973 inches on 81 days, compared with 7·724 inches on 67 days in 1901, 9·921 inches on 92 days in 1900, 9·652 inches on 87 days in 1899, 10·568 inches on 84 days in 1898, 10·693 inches on 93 days in 1897, 5·971 inches on 70 days in 1896, 10·410 inches on 68 days in 1895, 12·709 inches on 90 days in 1894, 7·908 inches on 66 days in 1893, and a twenty-five years' average of 10·496 inches on 81·6 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 2·535 inches distributed over 20 days—·540 inch falling on the 30th, and ·500 inch on the 29th. The total fall since January 1st, 1902, equals 11·750 inches on 68 days, compared with 11·205 inches on 65 days in 1901, and 16·381 inches on 84 days in 1900, 15·475 inches on 86 days in 1899, 12·445 inches on 78 days in 1898, 14·120 inches on 90 days in 1897, 5·716 inches on 52 days in 1896, 12·845 inches on 58 days in 1895, 15·696 inches on 85 days in 1894, and 9·565 inches on 65 days in 1893.

Dr. Arthur S. Goff returns the rainfall at Lynton, Dundrum, Co. Dublin, as 3·26 inches on 22 days, compared with 1·09 inches on 10 days in May, 1901, the greatest daily measurement being ·78 inch on the 30th. Thunder and lightning occurred on the 17th; thunder was heard on the 28th. The temperature in the shade ranged from 67° on the 24th to 37° on the 7th. The mean temperature of the month was 50·5° compared with 52·6° in May, 1901. Hail fell on the 17th, 18th, and 28th; sleet on the 17th.

The rainfall at Cloneevin, Killiney, was 2·58 inches on 21 days, compared with 1·20 inches on 10 days in May, 1901, ·57 inch being measured on the 30th. The average rainfall in May at this station during the 17 years, 1885-1901, inclusive, was 2·032 inches on 13·2 days. Since January 1st, 1902, 10·66 inches of rain have fallen at Cloneevin on 80 days. This compares with a 15 years' average of 9·782 inches on 71·7 days.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature for the month of May at that health resort was 50·3°, the extremes being—highest, 68°; lowest, 36°. At Bournemouth the mean was 50·7°, the extremes being—highest, 73°; lowest, 35°. The mean temperature at Kingstown during each and every one of the past winter months of November, December, January, February, and March, has been higher at Kingstown than at Bournemouth, the average for these 5 months being 43·6° at Kingstown, and 41·7° at Bournemouth. This relative condition of temperature is now becoming reversed as the summer solstice approaches, and from that period the summer heat becomes intense, and at times very oppressive on the south coast of England, while at

Kingstown it will be comparatively cool. The mean daily range at Kingstown was 12·4°, and at Bournemouth 16·1°. The mean temperature of the sea at Sandycove bathing-place was 51°. The rainfall at Kingstown was 2·22 inches on 19 days, and at Bournemouth 2·47 inches on 20 days. Thunder and lightning occurred on the 17th. The duration of bright sunshine at Kingstown was 179 9 hours, whereas it was 188 9 hours at the Ordnance Survey Office, Phœnix Park, 200·2 hours at Valentia, 173·2 hours at Parsonstown, 228·2 hours at Southport, and 143·9 hours at Eastbourne. The Mourne Mountains were visible at Kingstown on the 6th, 20th, and 29th.

JUNE.—Winter and summer may be said to have met in this month. The mean temperature of the three weeks ended the 21st was 53·2°, that of the fourth week was 63·0°, an excess of nearly 10°. In the second week (ended the 14th) the shade temperature rose no higher than 59·1°. In the fourth week (ended the 28th) the lowest shade temperature was 53·1°, and on the 25th the thermometer rose to 74·7° in the screen. Winds from polar quarters prevailed throughout the month, but their force was light in the fourth week, and unclouded sunshine overcame their chilling effect. Up to the 22nd the rainfall was frequent, but heavy only on the 1st (·648 inch) and 19th (·738 inch). The duration of sunshine was estimated at 193 hours, giving a daily average of 6·4 hours. The percentage of cloud was high for June—64 per cent.

In Dublin the arithmetical mean temperature (56·7°) was below the average (57·8°) by 1·1°; the mean dry-bulb readings at 9 a.m. and 9 p.m. were 55·6°. In the thirty-seven years ending with 1901, June was coldest in 1882 (M. T. = 55·8°) and 1879 ("the cold year") (M. T. = 55·9°). It was warmest in 1887 (M. T. = 62 3°); in 1896 (M. T. = 61·4°); and in 1899 (M. T. = 61·3°). In 1901 the M. T. was 56 9°.

The mean height of the barometer was 29 893 inches, or 0 024 inch below the corrected average value for June—namely, 29·917 inches. The mercury rose to 30·213 inches at 9 a.m. of the 24th, and fell to 29·490 inches at 9 a.m. of the 20th. The observed range of atmospheric pressure was, therefore, only 0·723 inch.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 55·6°, or 6·8° above the corresponding M. T. for May, 1902. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·465), the value was 56·2°, or 1·0° below the average mean temperature for June, calculated in the same way, in the twenty-five years, 1865-89, inclusive (57·2°). The arithmetical mean of the maximal and minimal readings was 56·7°, compared with a twenty-five years' average of 57 8°. On the 25th the thermometer in the screen rose to 74·7°—wind, E.N.E. to S.S.E.; on the 10th the temperature fell to 42·1°—wind, W. The minimum on the grass was 37·6° on the 10th.

The rainfall amounted to 2·371 inches on 17 days The average rainfall for June in the twenty-five years, 1865-1889, inclusive, was 1·817 inches, and the average number of rainy days was 13·8. The rainfall, therefore, and the rainy days were much above the average. It is, however, to be noted that 59 per cent. of the whole precipitation for the month occurred on two days—the 1st and 19th. In 1878 the rainfall in June was very large—5·058 inches on 19 days; in 1879, also, 4·046 inches fell on 24 days. On the other hand, in 1889, only ·100 inch was measured on 6 days. In 1887 the rainfall was only ·252 inch, distributed over 5 days. In 1900, 3·169 inches fell on as many as 22 days.

High winds were noted on only 5 days, and never reached the force of a gale. The atmosphere was foggy on the 24th. A lunar halo was seen on the 18th; solar halos appeared on the 4th, 21st, and 24th. Temperature reached or exceeded 70° in the screen on 7 consecutive days, commencing with the 23rd, compared with only one day in 1901, but as many as 17 days in 1887. Lightning was seen on the night of the 19th, and a thunderstorm occurred in the evening of the 29th.

The rainfall in Dublin during the six months ending June 30th, amounted to 12·344 inches on 98 days, compared with 9·352 inches on 80 days in 1901, 13·090 inches on 114 days in 1900, 11·295 inches on 95 days in 1899, 12·115 inches on 98 days in 1898, 13·950 inches on 113 days in 1897, 7·854 inches on 84 days in 1896, 12·282 inches on 80 days in 1895,-14·361 inches on 109 days in 1894, 9·624 inches on 78 days in 1893, only 6·741 inches on 67 days in 1887, and a twenty-five years' average of 12·313 inches on 95·4 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 3·341 inches on 16 days. Of this quantity ·900 inch fell on the 1st, and ·830 inch on the 19th. The total fall since January 1st has been 15·091 inches on 84 days, compared with 13·670 inches on 75 days in the first six months of 1901, 18·191 inches on 105 days in those of 1900, 19·510 inches on 95 days in 1899, 13·500 inches on 88 days in 1898, 18·125 inches on 106 days in 1897, 7·356 inches on 61 days in 1896, 14·270 inches on 67 days in 1895, 17·381 inches on 96 days in 1894, and 11·776 inches on 75 days in 1893.

Dr. Arthur S. Goff reports the rainfall at Lynton, Dundrum, Co. Dublin, as 3·08 inches on 19 days, compared with 1·71 inches on 13 days in June, 1901, the greatest daily falls being ·90 inch on the 19th and ·87 inch on the 1st. The mean shade temperature was 57·0°. The thermometric range was from 45° on the 10th, 13th, and 15th to 78° on the 29th, when a thunder shower occurred.

The rainfall at Cloneevin, Killiney, Co. Dublin, was 2·60 inches on 18 days. The maximal fall in 24 hours was ·63 inch on the 1st. The average rainfall in June in the 17 years (1885-1901) was 2·564 inches on 15·2 days. The total fall at Cloneevin since January, 1st, 1902, amounts to 13·26 inches on 98 days.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature at that health resort was 55·9°, the extremes being—highest, 72 5° on the 25th; lowest, 44 5° on the 10th and 13th. At Bournemouth the mean was 57·8°, the extremes being—lowest, 44° on the 16th and 17th; highest, 80° on the 28th and 29th. These figures confirm the statement in last report that the relative condition of temperature at Kingstown and at Bournemouth becomes reversed at or about the summer solstice, etc. The daily range of temperature at Kingstown was 11 8° and at Bournemouth 13·8°. The mean temperature of the sea at Sandycove Bathing Place was 55°. The rainfall was 2·14 inches on 16 days at Kingstown, and at Bournemouth 2·81 inches on 16 days. The total duration of bright sunshine at Kingstown was 165 8 hours, whereas it was 177·6 hours at the Ordnance Survey Office, Phœnix Park, 159·4 hours at Valentia, 137·1 at Parsonstown, 179 9 at Southport, and 162 7 at Eastbourne. The average duration of bright sunshine for the month of June, during 11 years (1891-1901), at the Ordnance Survey Office, Phœnix Park, was 206·3 hours.

JULY.—The month opened well, and spells of warm, summer-like weather were enjoyed in the first fortnight; but after the 17th temperature ruled particularly low, and the reign of cold, north-westerly winds was resumed, with sunless skies and heavy rains on the 19th, 25th, and 26th. During the last-named two days a rainstorm of much intensity prevailed—1·796 inches falling in Dublin in the 24 hours ended 6 p.m. of Saturday, the 26th. The downpour was much heavier in Co. Wicklow—for example, 2 43 inches were measured at Fassaroe, near Bray, as the result of 8 hours' rainfall, on the night of the 25th. This torrential rainfall was connected with the passage in a north-easterly direction from the South of Ireland to Scandinavia of a deep depression, in which the barometer sank to 29·19 inches in Dublin on the afternoon of the 26th. The duration of bright sunshine was estimated at 161¼ hours, or a daily average of 5·2 hours, compared with a twenty-years' average (1881-1900) of 166·8 hours recorded at the Ordnance Survey Office, Phœnix Park.

In Dublin the arithmetical mean temperature (59·6°) was below the average of the 30 years 1871-1900 (60·3°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 58·5°. In the thirty-seven years ending with 1901, July was coldest in 1879 ("the cold year") (M. T.= 57·2°). It was warmest in 1887 (M. T.=63·7°); and in 1868 ("the warm year") (M. T.=63·5°). In 1900 the M. T. was 63·4°, and in 1901, 63·5°.

The mean height of the barometer was 30·027 inches, or 0·112 inch above the corrected average value for July—namely, 29·915 inches. The mercury rose to 30·240 inches at 9 a.m. of the 5th, and fell to 29·194 inches at 4 p.m. of the 26th. The observed range of atmospheric pressure was, therefore, 1·046 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 58·5°, or 2 9° above the value for June, 1902. Using the formula, *Mean Temp.* $= Min. + (Max. - Min. \times \cdot 465)$, the value was 59·1°, or 0·7° below the average mean temperature for July, calculated in the same way, in the thirty years 1871-1900, inclusive (59·8°). The arithmetical mean of the maximal and minimal readings was 59·6°, compared with a thirty years' average of 60·3°. On the 13th the thermometer in the screen rose to 74·8°—wind, W.; on the 21st the temperature fell to 45·1°—wind N.N.W. The minimum on the grass was 42·0° on the 21st.

The rainfall was 3·163 inches, distributed over 17 days. The average rainfall for July in the thirty-five years 1866-1900, inclusive, was 2·560 inches, and the average number of rainy days was 18. The rainfall, therefore, was much above, but the rainy days were rather below, the average. In 1880 the rainfall in July was very large—6·087 inches on 24 days; in 1896, also, 5·474 inches fell on 18 days. On the other hand, in 1870, only ·539 inch was measured on 8 days; in 1869, the fall was only ·739 inch on 9 days; and in 1868, ·741 inch fell on but 5 days. In 1900, 4·519 inches fell on 15 days, and in 1901, 2·080 inches on 13 days.

High winds were noted on 10 days, and attained the force of a gale on three occasions—the 8th, 10th and 25th. Temperature reached or exceeded 70° in the screen on 7 days, compared with 16 days in July, 1901. In July, 1887, temperature reached or exceeded 70° in the screen on no fewer than 17 days. In 1888 the maximum for July was only 68·7°. On 4 days the thermometer failed to reach 60°.

There were no electrical disturbances. Solar halos were seen on the 2nd and 26th.

The rainfall in Dublin during the seven months ending July 31st amounted to 15·507 inches on 115 days, compared with 11·432 inches on 93 days in 1901, 17·609 inches on 129 days in 1900, 14·416 inches on 107 days in 1899, 13·060 inches on 106 days in 1898, 15·600 inches on 125 days in 1897, 13·328 inches on 102 days in 1896, 16·785 inches on 96 days in 1895, 7·935 inches on 80 days in 1887, and a thirty-five years' average of 14·620 inches on 113 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall in July was 4·550 inches on 11 days, compared with 2·390 inches on 10 days in 1901, 5·140 inches on 15 days in 1900, 3·480 inches on 14 days in 1899, 1·145 inches on 6 days in 1898, 1·625 inches on 10 days in 1897, 5·726 inches on 16 days in 1896 and 3·680 inches on 16 days in 1895. Of the total rainfall ·850 inch fell on the 3rd, ·950 inch on the 20th, and 2·120 inches on the 25th. The total fall since January 1st has been 19·641 inches on 95 days, compared with 16·060 inches on 85 days in 1901, 23·331 inches on 120 days in 1900, 22·990 inches on 109 days in 1899, 14·645 inches on 94 days in 1898, 19·750 inches on 116 days in 1897, 13·082 inches on 77 days in 1896, and 17·950 inches on 83 days in 1895.

At Cloneevin, Killiney, Co. Dublin, the rainfall in July was 3·64 inches on 13 days, compared with a seventeen years' (1885-1901) average of 3·202 inches on 16·7 days. On the 25th the rainfall was 1·73 inches. In July, 1901, 2·80 inches fell on 13 days; in 1900, 4·56 inches on 16 days; in 1899, 3 48 inches on 17 days; in 1898, ·84 inch on 7 days; in 1897, 1·28 inches on 10 days; in 1896, 6·72 inches on 20 days; in 1895, 3·58 inches on 17 days; in 1885, only ·70 inch on 9 days. Since January 1st, 1902, 16·90 inches of rain have fallen on 111 days at this station, compared with 18 38 inches on 129 days in the corresponding 7 months of 1900, and 13·54 inches on 95 days in 1901.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, County Dublin, the rainfall was 4·27 inches on 19 days, 1·81 inches being measured on the 25th. The mean temperature was 60·6°, the range being from 75° on the 12th to 47° on the 21st. In July, 1901, 2·65 inches of rain fell at this station on 11 days.

Dr. B. H. Steede reports that at the National Hospital for Consumption, Newcastle, Co. Wicklow, the July rainfall was 3·796 inches on 13 days. The maximal temperature in the shade was 74·0° on the 8th, the minimal shade temperature was 44·0° on the 25th. The heaviest daily rainfalls were ·900 inch on the 19th, and 2·050 inches on the 25th. At this station the rainfall in May was 2·383 inches on 23 days; the thermometer rose to 68·2° in the screen on the 23rd, and fell to 37·0° on the 21st. In June the rainfall was 3·072 inches on 18 days, ·885 inch being registered on the 1st and ·720 inch on the 19th. The thermometer rose to 77·0° in the screen on the 25th, and fell to 44·0° on the 9th and 10th. The rainfall from January 1st to July 31st, inclusive, was 18·274 inches on 108 days.

At the Ordnance Survey Office, Phœnix Park, Dublin, rain fell on 16 days to the amount of 2·640 inches, the greatest rainfall in 24 hours being 1·030 inches on the 25th.

At Cork the rainfall was 2·40 inches on 7 days, or 0·18 inch below the average. On the 25th, 1·86 inches fell, or about three-fourths of the entire precipitation for the month.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health at Kingstown, Co. Dublin reports that the mean temperature at that health resort was 59·5°, being 2·2° below the average for July during the previous 4 years, the extremes being—highest, 75·5° on the 8th; lowest, 45·5° on the 28th. AtBournemouth the mean temperature was 62·1°, or 1·7° below the average for July during the previous 4 years, the extremes being—highest, 83° on the 8th and 16th; lowest, 46° on the 21st. The maximum was above 75° on 12 days, and on 5 of these days it was between 76° and 83°; whereas it reached 75° on only 2 days at Kingstown. The mean temperature at Ventnor, Isle of Wight, for July during the previous 4 years has been higher than that at Bournemouth—namely, 64·0°. The mean daily range at Kingstown was 12·2°, whereas at Bournemouth it was 19·2°. These values for Bournemouth show that although the mean temperature was below the average for the month during the previous 4 years, yet the heat was excessive, and taken along with a high daily range must be regarded as trying to most constitutions, and especially to invalids. The mean sea temperature at Sandycove bathing place was 58°. The mean height of the barometer (corrected) was for 9 a.m. 30·041 inches, and for 9 p.m. 30·038 inches. The rainfall amounted to 3·66 inches on 13 days, whereas at Bournemouth it was only 1·62 inches on 12 days. Between 9 p.m. on the 25th and 9 a.m. on the 26th 1·73 inches of rain fell at Kingstown. The total duration of bright sunshine at Kingstown was 152·4 hours, whereas it was 169·3 hours at the Ordnance Survey Office, Phœnix Park, 161 hours at Valentia, 141·3 hours at Parsonstown, 171·5 hours at Southport, and 192·2 hours at Eastbourne.

AUGUST.—A changeable, cool month, with a continued prevalence of polar winds. A rainstorm of considerable violence on the 5th and 6th was preceded by marked visibility on the 4th—a beautiful day in Ireland—when Snowdon and the whole range of the Welsh mountains were seen from the Wicklow uplands. Only once—on the 18th—did the thermometer rise above 70° in the shade in Dublin, whereas on 3 nights temperature fell below 45° in the screen. Bright sunshine was estimated at 162·75 hours, or a daily average of 5·25 hours, compared with a twenty-years' average of 162·7 hours, or 36 per cent. of its possible duration, recorded at the Ordnance Survey Office, Phœnix Park. Extraordinary local "splashes" of rain occurred on the 24th—at Kingstown (·220 inch in 10 minutes), on the 26th in Dublin, where large hailstones fell, and on the 27th at Blackrock.

In Dublin the arithmetical mean temperature (58·4°) was distinctly below the average (59·7°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 57·3°. In the thirty-seven years ending with 1901, August was coldest in 1881 (M. T. = 57·0°), and warmest in 1899 M. T. = 63·4°). In 1901 the M. T. was 60·5°.

The mean height of the barometer was 29·908 inches, or 0·011 inch above the corrected average value for August—namely, 29·897 inches. The mercury rose to 30·225 inches at 9 a.m. of the 1st, and fell to 29·496 inches at 4 p.m. of the 18th. The observed range of atmospheric pressure was, therefore, 0·729 inch.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 57·3°. It was 1·2° below the value for July, 1902. Using the formula, $Mean\ Temp. = Min. + (Max. - Min. \times ·47)$, the mean temperature was 58·0° or 1·3° below the average mean temperature for August, calculated in the same way, in the thirty years, 1871-1900, inclusive (59·3°). The arithmetical mean of the maximal and minimal readings was 58·4°, compared with a thirty years' average of 59·7°. On the 18th the thermometer in the screen rose to 71·2°—wind, S.W.; on the 4th and 11th the temperature fell to 44·8°—wind, N.W. The minimum on the grass was 39 9° on the 30th.

The rainfall was 2·949 inches on 18 days. The average rainfall for August in the thirty-five years, 1866-1900, inclusive, was 3·040 inches, and the average number of rainy days was 17. The rainfall, therefore, was slightly below the average, while the rainy days were slightly above it. In 1900 the rainfall in August was very large—5·871 inches on 17 days, establishing a record for August in Dublin; in 1889, 5·747 inches were registered on 22 days. On the other hand, in 1884, only ·777 inch was measured on 8 days. In 1901, 2·952 inches fell on 13 days.

High winds were noted on only 4 days, and never attained the force of a gale. Temperature reached 70° in the screen on only one day, compared with 18 days in August, 1899, 6 in August, 1900, and 7 in August, 1901. The atmosphere was foggy on the 5th, 15th, 17th, and 31st. Hail fell on the 26th. Lightning was seen on the 7th and 29th. Solar halos appeared on the 15th and 16th. There was a lunar halo on the 16th.

The rainfall in Dublin during the eight months ending August 31st amounted to 18·456 inches on 133 days, compared with 14·384 inches on 106 days in 1901, 23·480 inches on 146 days in 1900, 18·200 inches on 117 days in 1899, 16·516 inches on 124 days in 1898, 19·388 inches on 149 days in 1897, 14·464 inches on 120 days in 1896, 9·455 inches on 96 days during the same period in 1887, and a thirty-five years' average of 17·660 inches on 130 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 3·520 inches on 16 days, compared with 3·625 inches on 15 days in 1901, 5·995 inches on 16 days in 1900, 2·640 inches on 11 days in 1899, 3·185 inches on 18 days in 1898, 6·195 inches on 27 days in 1897, and 1·245 inches on 14 days in 1896. The heaviest falls in 24 hours were 1·580 inches on the 6th and ·590 inch on the 5th. The total fall since January 1st amounts to 23·161 inches on 111 days, compared with 19·685 inches on 100 days in 1901, 29·326 inches on 136 days in 1900, 25·630 inches on 120 days in 1899, 17·830 inches in 112 days in 1898, 25·945 inches on 143 days in 1897, 14·327 inches on 91 days in 1896, 22·685 inches on 107 days in 1895, 25·206 inches on 131 days in 1894, and 16·341 inches on 106 days in 1893.

Dr. B. H. Steede reports that at the National Hospital, Newcastle, Co. Wicklow, the rainfall was 4·084 inches on 14 days, compared with 3·055 inches on 15 days in August, 1901, 3·988 inches on 12 days in 1900, 1·877 inches on 13 days in 1899, 3·803 inches on 16 days in 1898, and 4·526 inches on 20 days in 1897. The heaviest falls were 1·567 inches on the 6th, and ·672 inch on the 5th. Since January 1st, 1902, the rainfall at this Second Order Station has been 22·358 inches on 122 days, compared with 16·646 inches on 100 days in the first 8 months of 1901, 24·144 inches on 130 days in the same period of 1900, 23·748 inches on 117 days in that of 1899, and 20·101 inches on 110 days in that of 1898. The maximal temperature in the shade was 65·8° on the 18th, and the minimum temperature was 44·0° on the 29th.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, County Dublin, rain fell on 18 days, the total measurement being 2·73 inches, and the heaviest rainfall in 24 hours being 1·16 inches on the 6th. The corresponding figures for August, 1901, were 3·11 inches on 16 days. The mean shade temperature was 58·7°, the range being from 70° on the 18th to 44° on the 31st. In August, 1901, the M. T. was 60·5°.

At Cork the rainfall was 2·89 inches, or 0·68 inch below the average, the maximal fall in 24 hours being 0·72 inch on the 7th. There were 15 rainy days.

At the Ordnance Survey Office, Phœnix Park, Dublin, rain fell on 18 days to the amount of 2·371 inches, the greatest measurement in 24 hours being ·825 inch on the 6th.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health at Kingstown, Co. Dublin, reports that the mean temperature at that health resort was 58·9°, being 0·4° below the average for August during the previous four years, the extremes being—highest, 72·0° on the 18th; lowest, 43·5° on the 5th. At Bournemouth the mean temperature was 61·3°, or 1·6° below the average for August during the previous four years, the extremes being—highest, 78° on the 30th; lowest, 46° on the 2nd. The maximum temperature was above 70° on 14 days at Bournemouth, whereas it reached 70° on only two days at Kingstown. The mean daily range of temperature at Kingstown was 12·5°, whereas at Bournemouth it was 15·6°. The mean sea temperature at Sandycove bathing place was 58·4°. The mean height of the barometer (corrected) was 29·881 inches. The mean humidity of the air was 76 per cent. The rainfall amounted to 2·43 inches on 15 days, whereas at Bournemouth it was 4·4 inches on 18 days. The greatest daily rainfall was 1·11 inches, in 12 hours, on the 6th, and at Bournemouth 0·45 inches on the 9th. The total duration of bright sunshine was 175·5 hours, whereas it was 171·9 hours at the Ordnance Survey Office, Phœnix Park, 158·9 hours at Valentia, 184·8 hours at Parsonstown, 187·1 hours at Southport, and 154·9 hours at Eastbourne.

SEPTEMBER.—Notwithstanding a violent rainstorm on the 2nd and 3rd, which yielded 2·075 inches out of a total rainfall of 2·969 inches for the month, September, 1902, proved favourable. The mean temperature was a shade (0·2°) above normal. The percentage of cloud was 59·3. Fog was prevalent in anticyclones from the 6th to the 8th and from the 24th to the 28th, inclusive. The duration of bright sunshine was estimated at 139·5 hours, or 37 per cent. of the possible duration, equal to a daily mean of 4·7 hours, compared with a twenty years' mean of 143·4 hours recorded at the Ordnance Survey Office, Phœnix Park, or 38 per cent. of the possible duration. The most prevalent winds were N.E. and W.

In Dublin the arithmetical mean temperature (56·1°) was slightly above the average (55·9°); the mean dry-bulb readings at 9 a.m. and 9.m. were 54·9°. In the thirty-seven years ending with 1901, September was coldest in 1886 and 1892 (M. T. = 53·0°), and warmest in 1865 (M. T. = 61·4°) and 1898 (M. T. = 60·2°). In 1901 the M. T. was 57·7°.

The mean height of the barometer was 30·042 inches, or 0·132 inch above the corrected average value for September—namely, 29·910 inches. The mercury rose to 30·504 inches at 9 a.m. of the 28th, having fallen to 29·141 inches at 7-15 a.m. of the 3rd. The observed range of atmospheric pressure was, therefore, 1·363 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 54·9°, or only 2·4° below the value for August, 1902. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·476), the mean temperature was 55·8°, or 0·2° above the average mean temperature for September, calculated in the same way, in the thirty years, 1871-1900, inclusive (55·6°). The arithmetical mean of the maximal and minimal readings was 56·1°, compared with a thirty years' average of 55·9°. On the 22nd the thermometer in the screen rose to 69·0°—wind, S.; on the 18th the temperature fell to 41·6°—wind, W.N.W. The minimum on the grass was 35·7°, also on the 18th.

The rainfall was 2·969 inches, on 16 days. The average rainfall for September in the thirty-five years, 1866-1900, inclusive, was 2·220 inches, and the average number of rainy days was 15. In 1871 the rainfall was very large—4·048 inches on, however, only 13 days; in 1896 no less than 5·073 inches fell on 23 days, establishing a record rainfall for September. On the other hand, in 1865, only ·056 inch was measured on but 3 days. In 1901, 3·686 inches fell on 18 days.

High winds were noted on only 6 days, and attained the force of a gale on 2 occasions—the 3rd and 21st. The atmosphere was foggy on the 6th, 7th, 8th, 19th, 24th, 26th, 27th, and 28th. Solar halos were observed on the 4th and 19th.

The rainfall in Dublin during the nine months ending September 30th amounted to 21·425 inches on 149 days, compared with 18·070 inches on 124 days, in the same period of 1901, 24·394 inches on 156 days in 1900, 20·948 inches on 138 days in 1899, only 10·968 inches on 112 days in 1887, and a thirty-five years' average of 19·880 inches on 145 days.

Mr. Robert O'Brien Furlong, C.B., reports that at Cloneevin, Killiney, Co. Dublin, the rainfall in August, 1902, was 2·31 inches on 15 days, the maximum being 1·02 inches on the 6th. The average August rainfall in the seventeen years, 1885-1901, was 3·202 inches on 16·7 days. In September, 1902, the rainfall at this station was 4·18 inches on 13 days, 2·81 inches being measured on the 2nd. This is the largest amount as yet measured at that station in 24 hours, the next being 2·06 inches on November 23rd, 1898. The average rainfall in September in the seventeen years, 1885-1901, was 1·936 inches on 13 days. Since January, 1902, the rainfall at Cloneevin equals 23·39 inches on 139 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 3·995 inches on 12 days, compared with 5·420 inches on 19 days in September, 1901, and only ·695 inch on but 4 days in September, 1900. The heaviest fall in 24 hours was 2·930 inches on the 2nd. At Knockdolian the rainfall since January 1st, 1902, has been 27·156 inches on 123 days, compared with 25·105 inches on 119 days in 1901, 30·021 inches on 140 days in 1900, 28·440 inches on 139 days in 1899, and 19·688 inches on 124 days in 1898.

Dr. B. H. Steede reports that at the National Hospital for Consumption, Newcastle, Co. Wicklow, rain fell in measurable quantity on 14 days to the large amount of 3·807 inches, compared with 5·107 inches on 21 days in September, 1901, only ·904 inch on but 6 days in 1900, 2·411 inches on 12 days in 1899, 1·991 inches on 13 days in 1898, and 3·166 inches on 11 days in the same month of 1897. The maximal fall in 24 hours was 2·370 inches on the 2nd. Since January 1st, 1902, the rainfall at this Second Order Station has been 26·165 inches on 136 days, compared with 21·753 inches on 121 days in 1901, 25·048 inches on 136 days in 1900, and 26·159 inches on 129 days in 1899. The highest temperature in the screen was 65·3° on the 26th; the lowest was 41·2° on the 18th.

Dr. Arthur S. Goff returns the rainfall at Lynton, Dundrum, Co. Dublin, at 4·09 inches on 19 days, compared with 5·03 inches on 18 days in September, 1901. The greatest daily fall was 2·24 inches on the 2nd. The mean temperature in the shade was 56·0°. The screened thermometers rose to 68° on the 9th, and fell to 38° on the 18th.

In the City of Cork the rainfall was 2·02 inches on 14 days, or 0·52 inch below the average for September. The rainfall was greatest on the 2nd, when 0·59 inch was measured. In the 9 months ended September 30th, the rainfall was 24·40 inches, or 2·09 inches below the average.

At the Ordnance Survey Office, Phœnix Park, Dublin, 2·635 inches fell in September on 16 days, the maximal fall in 24 hours being 1·640 inches on the 2nd.

Dr. J. Byrne Power, F.R. Met. Soc., Superintendent Medical Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature at that health resort was 56·5°, being 1·8° below the average for September during the previous four years, the extremes being—highest, 68·5° on the 7th; lowest, 42·0° on the 13th. At Bournemouth the mean was 58·1°, being 1·3° below the average for September during the previous four years; the extremes were—highest, 72·0° on the 9th; lowest, 42·0° on the 18th. The mean daily range of temperature was 12·0° at Kingstown, whereas at Bournemouth it was 14·9°. The mean sea temperature at Sandycove bathing place was 58·0°. The mean height of the barometer was 30·068 inches (corrected). The mean humidity of the air was 81 per cent. The rainfall amounted to 4·23 inches; that for the

24 hours ending 9 a.m. on the 3rd amounted to 2·83 inches, and exceeds by 0·66 inch the average for the entire month of September during 12 previous years (1873-1880 and 1898-1901). The rainfall at Bournemouth amounted to 1·47 inches. The total duration of bright sunshine was 122·7 hours, whereas it was 136·9 hours at the Ordnance Survey Office, Phœnix Park, 167·9 hours at Valentia, 146·6 hours at Parsonstown, 139·8 hours at Southport, and 159.6 hours at Eastbourne.

OCTOBER.—October, 1902, was noted for its clouded skies, deficient sunshine, frequent rainfall, and high mean temperature. The last characteristic depended more on the cloudy condition of the sky than on any remarkable prevalence of warm winds. The sun's power was checked by day through the persistence of clouds—70.5 per cent., while terrestrial radiation was interfered with by night through the same cause. Thus no extreme temperatures were recorded—the highest reading of the screened thermometers being 61·5°, the lowest 40·3°—range, 21·2°. While rain fell frequently—on 23 days—the falls were considerable only on the 4th (·809 inch), 9th (·323 inch), and 10th (·561 inch). A total eclipse of the moon was seen under exceptionally favourable circumstances early on the morning of the 17th.

In Dublin the arithmetical mean temperature (51·7°) was very decidedly above the average (49 4°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 50·6°. In the thirty-seven years ending with 1901, October was coldest in 1892 (M. T.=44 8°) and in 1896 (M. T. =45·0°) It was warmest in 1876 (M. T.=53 1°). The M. T. in 1898 was 52·8°. In 1901 it was 49 8°.

The mean height of the barometer was 29 974 inches, or 0·134 inch above the corrected average value for October—namely, 29·840 inches. The mercury rose to 30·410 inches at 9 p.m. of the 23rd, having fallen to 29·180 inches at 9 p.m. of the 15th. The observed range of atmospheric pressure was, therefore, 1·230 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 50·6°, or 4·3° below the value for September, 1902. The arithmetical mean of the maximal and minimal readings was 51·7°, compared with a thirty years' average of 49·4°. Using the formula, *Mean Temp.=Min.+(Max.—Min.* × ·485), the mean temperature was 51·5°, or 2·3° above the average mean temperature for October, calculated in the same way, in the thirty years, 1871-1900, inclusive (49·2°). On the 12th the thermometer in the screen rose to 61·5°=wind, S.S.W.; on the 17th the temperature fell to 40·3°—wind, W.N.W. The minimum on the grass was 35 3° on the 12th. The thermometer did not sink to 32° in the screen, or even on the ground, in the City.

The rainfall was 3·056 inches, distributed over 23 days—the rainfall and the rainy days were above the average. The average rainfall for October in the thirty-five years, 1866-1900, inclusive, was 2·940 inches, and the average number of rainy days was 18. In 1880 the rainfall in October was very large—7·358 inches on 15 days. In 1875, also, 7·049 inches fell on 26 days. On the other hand, in 1890, only ·639 inch fell on but 11 days; in 1884, only ·834 inch on but 14 days; and in 1868 only ·856 inch on 15 days. In 1901 the October rainfall was 2·396 inches on 21 days.

High winds were noted on 14 days, but attained the force of a gale on only one occasion —the 15th. The atmosphere was more or less foggy in Dublin on the 8th and 11th. The duration of bright sunshine was estimated at only 84·25 hours, compared with 127·25 hours in October, 1900, and 115·25 hours in October, 1901.

The rainfall in Dublin during the ten months ending October 31st amounted to 24·481 inches on 172 days, compared with 12·366 inches on 123 days during the same period in 1887 (the dry year), 27·863 inches on 177 days in 1900, 20·466 inches on 145 days in 1901, and a thirty-five years' average of 22·820 inches on 163 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall in October amounted to 4·655 inches on 17 days. Of this quantity, ·950 inch fell on the 11th, ·750 inch on the 12th, and ·590 inch on the 10th. From January 1st, 1902, up to October 31st, rain fell at Knockdolian on 140 days to the total amount of 31·811 inches. In 1893 the rainfall in the corresponding ten months was 17·801 inches on 133 days; in 1894, 32·221 inches on 154 days; in 1897, 32·730 inches on 171 days; in 1898, 24·177 inches on 140 days; in 1899, 30·000 inches on 150 days; in 1900, 33·311 inches on 155 days; and in 1901, 28·030 inches on 135 days.

At Cloneevin, Killiney, Co. Dublin, the rainfall in October was 2·760 inches on 20 days, compared with ·710 inch on 14 days in 1893, 6·460 inches on 17 days in 1894, 2·830 inches on 17 days in 1900, 2·520 inches on 21 days in 1901, and a seventeen years' average (1885-1901) of 3·121 inches on 16 1 days. On the 4th, ·77 inch fell. Since January 1st, 1902, 26·150 inches of rain have fallen at this station on 159 days.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, rain fell on 24 days to the amount of 3·45 inches, compared with 2·40 inches on 21 days in October, 1901. The greatest measurement in 24 hours was ·94 inch on the 10th. The mean temperature in the shade was 50·9°, the range being from 59° on the 24th and 29th to 41° on the 17th, 18th and 19th. The mean temperature of October, 1901, was 50·0°.

Dr. B. H. Steede reports: At the National Hospital for Consumption, Newcastle, Co. Wicklow, the rainfall in October was 3·577 inches on 18 days, compared with 3·175 inches on 13 days in 1897, 4·385 inches on 17 days in 1898, 1·484 inches on 11 days in 1899, 3·551 inches on 14 days in 1900, and 3·200 inches on 21 days in 1901. The heaviest falls in 24

hours were ·710 inch on the 7th, ·541 inch on the 10th, and ·500 inch on the 9th. The highest temperature in the screen was 61·0° on the 24th, the lowest was 40 0° on the 9th. At this Second Order Station the rainfall from January 1st to October 31st, inclusive, amounted to 29·742 inches on 154 days, compared with 26·479 inches on 139 days in the corresponding ten months of 1898, 27·643 inches on 140 days in 1899, 28·599 inches on 150 days in 1900, and 24·953 inches on 142 days in 1901.

In the City of Cork, rain fell on 18 days to the amount of 1·30 inches, or 2·03 inches less than the average for October. The greatest day's rainfall was 0·29 inch on the 25th.

At the Ordnance Survey Office, Phœnix Park, the rainfall was 2·732 inches on 23 days, compared with 2 790 inches on 20 days in October, 1901. The heaviest rainfall in 24 hours was ·510 inch on the 10th.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature at that health resort was 52·2°, being 0 2° above the average for October during the previous 4 years, the extremes being—highest, 63° on the 29th; lowest, 40° on the 19th. At Bournemouth the mean was 51·6°—highest, 63° on the 29th; lowest, 38° on the 31st. The mean daily range of temperature was 7·8° at Kingstown and at 12·5° at Bournemouth. The mean sea temperature at Sandycove bathing place was 54·8°. The mean humidity of the air was 88 per cent. The mean height of the barometer was 29 985 inches. The rainfall amounted to 2·32 inches on 19 days at Kingstown; at Bournemouth, to 1·89 inches on 16 days. The duration of sunshine was 67·5 hours at Kingstown, whereas it was 71·9 hours at the Ordnance Survey Office, Phœnix Park, being 19·9 hours below the shortest duration previously recorded for October, and 49·1 hours below the average at that station during the previous 11 years. It was 92·5 hours at Valentia, 68·5 hours at Parsonstown, 62 9 hours at Southport, and 75·4 hours at Eastbourne.

November.—November proved a fitting sequel to the dreary wet months of 1902 which preceded it. There was, indeed, a remarkable anti-cyclonic period—rainless, cold, and squally—from the 14th to the 21st inclusive; but, for the rest, rain fell almost daily and often heavily. The anticyclone alluded to was of great intensity and staying power. It was central over the southern half of Scandinavia, in which region the barometer rose to nearly 31 inches on the night of the 17th (Stockholm reported 30·96 inches; Wisby, 30·97 inches). Connected with this high pressure system a bitter easterly wind swept across Central Europe, accompanied by severe frost and snowstorms. In the British Isles the wind drew into S.E., and on the West Coast of Norway into S.W. On the morning of the 19th, the distribution of temperature was very curious. Berlin reported 14° F., while Bodo, on the Norwegian Coast, latitude 67° (that is, within the Arctic Circle), reported 44°, or 30° higher. In Dublin no frost occurred in the screen, but Birr had a temperature of 26° on the morning of the 20th, and even at Valentia the thermometer fell to 30° on the morning of the 30th. The duration of bright sunshine was estimated at 67·25 hours, or a daily average of 2·24 hours.

In Dublin the arithmetical mean temperature (47·5°) was considerably above the average (45·4°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 46·8°. In the thirty-seven years ending with 1901, November was coldest in 1878 (M. T. = 38·2°), and in 1870 (M. T. = 42·2°); warmest in 1899 (M. T. = 50·7°), and in 1881 (M. T. = 50·3°).

The mean height of the barometer was 29·746 inches, or 0·114 inch below the corrected average value for November—namely, 29·860 inches. The mercury rose to 30·287 inches at 9 a.m. of the 2nd, and fell to 29·060 inches about 3 p.m. of the 8th. The observed range of atmospheric pressure was, therefore, 1·227 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 46·8°, or 3·8° below the value for October, 1902. The arithmetical mean of the maximal and minimal readings was 47·5°, compared with a thirty years' (1871-1900) average of 45·4°. On the 1st the thermometer in the screen rose to 58·9°—wind, W.N.W.; on the 27th the temperature fell to 35·2°—wind, S.E. The minimum on the grass was 30·0° on the 20th.

The rainfall was 3·331 inches, on 18 days—the rainfall was considerably, while the rainy days were slightly, above the average. The average rainfall for November in the thirty-five years, 1866-1900, inclusive, was 2·560 inches, and the average number of rainy days was 17·0. In 1888, 6·459 inches fell on 26 days. On the other hand, the rainfall in 1896 was only ·664 inch on 9 days. In 1899, 1·964 inches fell on 13 days, and in 1900, 4·873 inches on 19 days. In 1901 the rainfall was 3·620 inches on 11 days.

High winds were noted on 20 days, and attained the force of a gale on three days—the 8th, 11th, and 21st. The atmosphere was more or less foggy in Dublin on the 2nd, 3rd, 14th, 25th, 27th and 29th. A lunar halo was seen on the 9th. Lightning was seen on the 9th. Sleet and hail fell on the 20th—hail only on the 29th.

The rainfall in Dublin during the eleven months ending November 30th amounted to 27·812 inches on 190 days, compared with 15·378 inches on 141 days during the same period in 1887, 24·450 inches on 162 days in 1899, 32·736 inches on 196 days in 1900, 24·086 inches on 156 days in 1901, and a thirty-five years' average of 25·380 inches on 180 days.

At Cloneevin, Killiney, Co. Dublin, 4·03 inches of rain fell on 19 days, compared with a seventeen years' (1885-1901) average of 3·086 inches on 16·2 days. The maximal fall in 24 hours was ·66 inch on the 11th. Since January 1st, 1902, 30·18 inches of rain have fallen

at this station on 178 days. The corresponding figures for 1897 were 28·64 inches on 184 days; for 1898, 26·77 inches on 173 days; for 1899, 27·98 inches on 162 days; for 1900, 33·47 inches on 188 days; and for 1901, 26·10 inches on 161 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 5·290 inches on 17 days. Of the total quantity ·810 inch fell on the 11th, and ·700 inch on the 7th. From January 1st, 1902, up to November 30th, rain fell at Greystones on 157 days to the amount of 37·101 inches. The corresponding figures for 1897 were 38·185 inches on 188 days; for 1898, 28·786 inches on 156 days; for 1899, 32·870 inches on 162 days; for 1900, 30·926 inches on 173 days; and for 1901, 31·425 inches on 147 days.

Dr. B. H. Steede reports that at the National Hospital for Consumption, Newcastle, Co. Wicklow, the rainfall was 5·551 inches on 18 days, compared with 3·189 inches on 12 days in 1899, 5·724 inches on 18 days in 1900, and 3·196 inches on 13 days in 1901. The maximal falls in 24 hours were ·750 inch on the 11th, and ·642 inch on the 7th. Since January 1st, 1902, the rainfall at Newcastle amounted to 35·293 inches on 172 days. The corresponding figures for 1898 were 31·197 inches on 157 days; for 1899, 30·832 inches on 152 days; for 1900, 34·323 inches on 168 days; and for 1901, 28·149 inches on 155 days. On the 1st the screened thermometers at the National Hospital rose to 58·0°, on the 20th they fell to 30·8°.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, rain fell on 17 days to the amount of 4·61 inches, the greatest measurement in 24 hours being ·97 inch on the 6th. In November, 1901, the rainfall was 3·53 inches on 8 days. The mean temperature in the shade was 46·6°, the range being from 57° on the 1st to 35° on the 20th, 27th, and 29th.

In the City of Cork, rain fell on 21 days to the very large amount of 8·52 inches, or 4·57 inches above the average rainfall for November. There were three days in the month on which the measurement exceeded one inch—namely, the 6th, with 1·10 inches; the 10th, with 1·06 inches; and the 23rd, with 1·02 inches. The rainfall exceeded that of any November during the previous 37 years, and was more than double the average. The nearest approach to such a measurement was 7·87 inches in November, 1892.

At the Ordnance Survey Office, Phœnix Park, Dublin, the rainfall was 2·553 inches on 17 days, compared with 4·075 inches on 13 days in November, 1901. The heaviest rainfall in 24 hours was ·915 inch on the 6th.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature of November at that health resort was 47·7°, being 0·1° below the average for November during the previous 4 years. The extremes were —highest, 61° on the 2nd; lowest, 34·5° on the 29th. At Bournemouth the mean was 46·8°, being 0·1° above the average for November during the previous 4 years; the extremes were—highest, 58° on the 2nd and 7th; lowest, 30° on the 18th and 19th. The mean daily range of temperature at Kingstown was 8·5°; at Bournemouth it was 9·7°. The mean temperature of the sea at Sandycove Bathing Place was 51·8°, or 1·3° above the average for November during the previous 4 years. The average sea temperature for the past 3 months of September, October, and November at Kingstown has been as much as 2·8° above the average for these months during the previous 4 years. These facts may be interesting in connection with the low temperatures recorded elsewhere from the 18th to the 21st of the month. The mean humidity of the air was 73 per cent. The rainfall amounted to 3·61 inches on 17 days; at Bournemouth it was 2·41 inches on 15 days. The duration of bright sunshine was 38·9 hours, whereas at the Ordnance Survey Office, Phœnix Park, it was 54·9 hours, or 15·1 hours below the average for the month at that station during the previous 11 years. It was 39·8 hours at Valentia, 69·9 at Parsonstown, 45·7 at Southport, and 49·6 at Eastbourne.

DECEMBER.—A very open month, although cold periods occurred between the 3rd and 8th in connection with an anticyclone, and from the 28th to the close in relation to a large and deep atmospheric depression, in which the barometer sank to 28·250 inches at Wick at 8 a.m. of the 29th. Three days earlier the barometer touched 27·96 inches in the centre of a very large and deep disturbance near St. Petersburg. During the anticyclonic period early in the month persistent and severe cold prevailed in eastern and central Europe. Even in England also there was some sharp freezing—the thermometer falling to 14° at Loughborough on the morning of the 7th. It was not until the 16th that a general thaw set in over Germany. Just before Christmas the weather was both genial and fine, but a stormy, rainy period set in on Christmas Day. In Dublin City the estimated duration of bright sunshine was 53¼ hours, or a daily average of 1·72 hours.

In Dublin the arithmetical mean temperature (44·1°) was above the average (41·7°); the mean dry-bulb readings at 9 a.m. and 9 p.m. were 43·3°. In the thirty-seven years ending with 1901, December was coldest in 1878 (M. T. = 32·8°), and in 1874 (M. T. = 36·8°); warmest in 1898 (M. T. = 47·6°), and in 1900 (M. T. = 47·1°).

The mean height of the barometer was 29·991 inches, or 0·116 inch above the corrected average value for December—namely, 29·875 inches. The mercury rose to 30·533 inches at 9 p.m. of the 4th, and fell to 28·871 inches at 2 p.m. of the 29th. The observed range of atmospheric pressure was, therefore, 1·662 inches.

The mean temperature deduced from daily readings of the dry-bulb thermometer at 9 a.m. and 9 p.m. was 43·3°, or 3·5° below the value for November, 1902. Using the formula, *Mean Temp.* = *Min.* + (*Max.*—*Min.* × ·52), the value was 44·2°, or 2·3° above the average mean temperature for December, calculated in the same way in the thirty years, 1871-1900, inclusive

(41·9°). The arithmetical mean of the maximal and minimal readings was 44·1°, compared with a thirty years' average of 41·7°. On the 17th the thermometer in the screen rose to 58·0° —wind, S.; on the 7th the temperature fell to 29·6°—wind, S.E. The minimum on the grass was 23·5°, also on the 7th. There was frost in the screen on 3 days, and 9 days of frost on the grass were recorded.

The rainfall was 1·563 inches, distributed over 13 days. The average rainfall for December in the thirty-five years, 1866-1900, was 2 390 inches, and the average number of rainy days was 18. The rainfall, therefore, and also the rainy days were much below the average. In 1876 the rainfall in December was very large—7·566 inches on 22 days. In 1868 (which was otherwise a fine and dry year), 4·749 inches fell on as many as 27 days. On the other hand, in 1867, only ·771 inch was measured on 13 days; in 1885, only ·742 inch on 10 days; in 1892, only ·795 inch on 10 days; and in 1871, only ·797 inch on 15 days. In 1901, 1·989 inches of rain fell on 23 days.

A lunar halo was seen on the 13th. High winds were noted on as many as 19 days, and attained the force of a gale on seven occasions—the 1st, 14th, 16th, 25th, 27th, 28th, and 30th. The atmosphere was more or less foggy in Dublin on the 2nd, 3rd, and 7th. Snow or sleet fell on the 28th and 29th.

The rainfall in Dublin during 1902 amounted to 29·375 inches on 203 days, compared with 26·075 inches on 179 days in 1901, 34·338 inches on 216 days in 1900, 27·737 inches on 186 days in 1899, 27·048 inches on 194 days in 1898, 29·344 inches on 211 days in 1897, 26·901 inches on 194 days in 1896, 31·242 inches on 194 days in 1895, 29·261 inches on 209 days in 1894, only 20·493 inches on 174 days in 1893, 25·644 inches on 196 days in 1892, only 16·601 inches on 160 days in 1887, and a thirty-five years' average of 27·770 inches on 198 days.

At Knockdolian, Greystones, Co. Wicklow, the rainfall was 2·920 inches on only 11 days. Of this quantity ·950 inch fell on the 1st, and ·530 inch on the 16th. From January 1st to December 31st, 1901, rain fell at Knockdolian on 168 days, to the total amount of 40·021 inches. The corresponding figures for 1894 were 38·776 inches on 184 days; 1895, 35·135 inches on 174 days; 1896, 36·102 inches on 169 days; 1897, 42·885 inches on 210 days; 1898, 30·546 inches on 171 days; 1899, 36·690 inches on 182 days; 1900, 42·716 inches on 191 days; and 1901, 34·750 inches on 167 days.

Dr. B. H. Steede reports that at the National Hospital for Consumption at Newcastle, Co. Wicklow, rain fell on only 9 days, but to the considerable amount of 2·499 inches, ·563 inch being measured on the 1st, ·530 inch on the 14th, and ·568 inch (the maximum) on the 15th. The highest shade temperature was 57·2° on the 17th, the lowest was 30·5° on the 7th. At 9 p.m. of the 16th the thermometer stood at 57·0° in the open air. The rainfall for the year 1902 at this Station of the Second Order was 37·792 inches, distributed over 181 days. These figures compare with 40·193 inches on 194 days in 1897, 33·140 inches on 174 days in 1898, 34·699 inches on 174 days in 1899, 37·256 inches on 188 days in 1900, and 31·931 inches on 181 days in 1901.

The rainfall at Cloneevin, Killiney, was 2·08 inches on 14 days. The maximal fall in 24 hours was ·55 inch on the 1st. The average December rainfall of the 17 years (1885-1901) was 2·442 inches on 17·7 days.

Dr. Arthur S. Goff reports that at Lynton, Dundrum, Co. Dublin, rain fell on 16 days to the amount of 2·36 inches, ·46 inch being measured on the 1st. Temperature ranged from 56° on the 13th, 14th, and 16th to 29·0° on the 7th and 8th. The mean shade temperature was 42·8° Fahrenheit.

At the Railway Hotel, Recess, Connemara, Co. Galway, the rainfall was 4·760 inches on 20 days, compared with 9·413 inches on 26 days in December, 1899, 7·810 inches on 27 days in 1900, and 7·667 inches on 20 days in 1901. On the 15th 1·20 inches fell.

In the City of Cork the rainfall was 3·06 inches on 20 days, the maximal fall in 24 hours being ·66 inch on the 15th.

At the Ordnance Survey Office, Phœnix Park, Dublin, rain fell in December to the amount of 1·618 inches on 15 days. The amount of bright sunshine was 40·9 hours, the largest daily number of hours being 6·5 on the 2nd.

Dr. J. Byrne Power, F.R. Met. Soc., Medical Superintendent Officer of Health, Kingstown, Co. Dublin, reports that the mean temperature at that health resort was 44·5°, being 0·3° below the average for December during the previous four years. The extremes were—highest, 58·0° on the 16th; lowest, 33·5° on the 29th. The mean temperature at Portland Bill, situate about midway between Torquay and Ventnor, Isle of Wight, was 42·7°, the extremes being—highest, 53° on the 14th; lowest, 25° on the 7th. The mean daily range of temperature was 5·6° at Kingstown; at Portland it was 6·9°. The average sea temperature at Sandycove Bathing Place was 47·4°. The rainfall at Kingstown for the month amounted to 1·59 inches on 13 days; at Portland it was 1·53 inches on 14 days. The mean humidity of the air was 81 per cent. The duration of bright sunshine was 39·6 hours, whereas it was 40·9 hours at the Ordnance Survey Office, Phœnix Park, 37·9 at Parsonstown, 17·6 at Valentia, 18·8 at Southport, and 39·6 hours at Eastbourne.

The total rainfall at Kingstown for the year 1902 amounted to 30·14 inches on 175 days, being 1·31 inches above the average for 12 years (1873-1880 and 1898-1901). The greatest monthly rainfall was in September, amounting to 4·23 inches, and on the 3rd of that month 2·83 inches fell in 24 hours, being the greatest daily rainfall of which there is record at Kingstown. The annual mean temperature was 50·3°, being 0·2° below the average for 12 years (1873-1880 and 1898-1901). The total duration of bright sunshine during the year was 1,377 hours, whereas at the Ordnance Survey Office, Phœnix Park, it was 1,452 hours, and at Eastbourne it was 1,683·0 hours.

Rainfall in 1902.

At 40, Fitzwilliam-square, West, Dublin.

* Maximum

The rainfall was 29·375 inches, or 1·605 inches in excess of the average annual measurement of the thirty-five years, 1866-1900, inclusive—viz., 27·770 inches.

It is to be remembered that the rainfall in 1887 was very exceptionally small—16·601 inches—the only approach to this measurement in Dublin being in 1870, when only 20·859 inches fell; in 1884, when the measurement was 20·467 inches; and in 1893, with its rainfall of 20·493 inches. In nine of the thirty-five years in question the rainfall was less than 26 inches.

The scanty rainfall in 1887 was in marked contrast to the abundant downpour in 1886, when 32·966 inches—or as nearly as possible double the fall of 1887—fell on 220 days. In 1900 the rainfall was 34·338 inches, or 6·568 inches in excess of the average of the thirty-five years, 1866-1900. Only twice since these records commenced has the rainfall in Dublin exceeded that of 1900—namely, in 1872, when 35·566 inches fell on 238 days, and in 1880, when 34 512 inches were measured on, however, only 188 days.

In 1902 there were 203 rainy days, or days upon which not less than ·005 inch of rain (five-thousands of an inch) was measured. This was 5 above the average number of rainy days, which was 198, in the thirty-five years, 1866-1900, inclusive. In 1868 and 1887—the warm, dry years of recent times—the rainy days were only 160, and in 1870 they were only 145.

In 1902 the rainfall in 24 hours, from 9 a.m. to 9 a.m., only twice exceeded one inch—namely, on July 25th (1·342 inches) and September 2 (2·075 inches). In 1892 the daily rainfall twice exceeded 1 inch—viz., May 28th (2·056 inches) and August 16th (1·310 inches). On no occasion in 1893 did one inch of rain fall on a given day in Dublin. In 1894 falls of upwards of an inch of rain in 24 hours were recorded on 4 occasions—viz., May 15th (1·330 inches); July 24th (1·560 inches); August 25th (1·369 inches); and October 23rd (1·042 inches). In 1895, 1·802 inches fell on January 12th; 1·014 inches on July 24th; and 1·256 inches on July 25th. In 1896, 1·563 inches fell on July 8th; 2·020 inches on July 24th; and 1·388 inches on December 8th. In 1897, 1·166 inches fell on September 1st. In 1898, on November 23rd, 1·732 inches were measured. In 1899, the rainfall exceeded one inch on 4 occasions—namely, July 11th (1·402 inches); August 5th (2·227 inches); September 30th (1·042 inches); and December 28th (1·129 inches). In 1900, as in 1899, the rainfall exceeded one inch on 4 occasions—namely, July 27th (1·783 inches); August 2nd (2·135 inches); November 6th (1·103 inches); and November 27th (1·126 inches). In 1901, the rainfall only once exceeded one inch, but on that occasion (November 11th) the measurement was 2·037 inches. The excessive rainfall on September 2nd, 1902, is noteworthy—it amounted to 2·075 inches in Dublin (Fitzwilliam-square). It was the eighth occasion only since 1865—that is, in 37 years—upon which 2 inches have been measured in Dublin at 9 a.m. as the product of the preceding 24 hours' precipitation The previous excessive falls were—August 13th, 1874 (2·482 inches); October 27th, 1880 (2·736 inches); May 28th, 1892 (2·056 inches); July 24th, 1896 (2·020 inches); August 5th, 1899 (2·227 inches); August 2nd, 1900 (2·135 inches), and November 11th, 1901 (2·037 inches).

Included in the 203 rainy days in 1902 are 13 on which snow or sleet fell, and 21 on which there was hail. In January hail was observed on 1 day, in February on 1 day, in March on 5 days, in April on 3 days, in May on 6 days, in August on 1 day, in October on 2 days, and in November on 2 days. Snow or sleet fell on 4 days in January, 2 days in February, 3 days in March, 1 day in both April and November, and 2 days in December. Thunderstorms occurred once in May and once in June. Lightning was seen once in June, twice in August, and once in November.

The rainfall in the first six months was 12.344 inches on 98 days. The rainfall exceeded 3 inches in July (3·163), October (3 056), and November (3 331).

The rainfall was distributed as follows:—5·114 inches fell on 43 days in the first quarter, 7·230 inches on 55 days in the second, 9·081 inches on 51 days in the third, 7·950 inches on 54 days in the fourth, and last, quarter.

More or less fog prevailed on 51 occasions—6 in January, 10 in February, 6 in March, 5 in April, 1 in June, 4 in August, 8 in September, 2 in October, 6 in November, and 3 in December. High winds were noted on 126 days—13 in January, 6 in February, 10 in March, 12 in April, 7 in May, 5 in June, 10 in July, 4 in August, 6 in September, 14 in October, 20 in November, and 19 in December. The high winds amounted to gales (force 7 or upwards, according to the Beaufort scale) on 26 occasions—3 in January, 3 in February, 1 in March, 2 in April, 1 in May, 3 in July, 2 in September, 1 in October, 3 in November, and 7 in December.

Solar halos were seen on 17 occasions, lunar halos on 6.

Mr. Robert O'Brien Furlong, M.A., C.B., writes:—

The rainfall at Cloneevin, Killiney, for the year 1902 amounted to 32·26 inches on 192 days. As in 1901, the highest monthly fall was in September, when 4·18 inches were measured on 13 days, of which 2·81 inches fell on the 2nd.

The greatest number of days in any month on which rain fell was 21 in March and also in May.

The month of the least rainfall was March, with 1·50 inches on 21 days.

The heaviest fall in 24 hours was 2·81 inches on September 2nd. This is the greatest amount so far measured at this station in 24 hours—the next highest being 2·06 inches on November 23rd, 1898.

The average yearly fall during 17 years (1885-1901) was 27·86 inches on 182 days. The rainfall of 1902 was 4·40 inches, and the number of days on which rain fell was 10, in excess of this average. Snow and sleet or hail were noticed on 8 days.

NOTE.—The mean pressures shown in the above Table have been given corrected for instrumental error and reduced to 32° Fahrenheit, but not reduced to mean sea level. If it be desired for any purpose to reduce them to the normal, the approximate correction for the purpose (varying within slight limits with the pressure and the temperature) is: + ·058.

DUBLIN CASTLE,

27th July, 1903.

No. 14,569.

SIR,

I have to acknowledge the receipt of your letter of the 24th inst, forwarding, for submission to His Excellency the Lord Lieutenant, the Annual Report of the Registrar General for Ireland on Marriages, Births, and Deaths for 1902.

I am, Sir,

Your obedient servant,

J. B. DOUGHERTY.

The REGISTRAR GENERAL,

CHARLEMONT HOUSE,

RUTLAND SQUARE.
